

# Esri International User Conference

July 11-15,  
2011

San Diego, CA

## Geospatial Inspiration

Hear from Esri president Jack Dangermond and gain the vision and insight you need to make the most of GIS.

## Personalized Support

Bring your technical questions to Esri's expert staff and get solutions to your unique challenges.

## Hands-on Learning

Try out our latest software and take advantage of free self-paced training at the Hands-on Learning Lab.

## Understanding Our World

GIS reveals the complex workings of our world, and everything you need to know to harness its power is found at the Esri UC. In one week, this event offers unrivaled opportunities for new and seasoned GIS professionals to hone their ArcGIS skills, gain time-saving tips and tricks, and make valuable connections with colleagues and geospatial technology experts.
