S.O. # 56545014

Please find attached the Terms and Conditions (T&C) package, applicable for providing Fort Bend County with the requested underground service of 535 kVA from (1) 750 kVA, 34.5 kV - 480Y/277 volt, 3 phase, 4 wire, pad mounted transformer.

After applying a credit for standard overhead service, the cost for the facilities required to provide the requested underground service is as follows:

| | |
|-----------------------------------|-----------|
| REQUESTED UNDERGROUND SERVICE | \$ 12,700 |
| (Ducts & pad by Fort Bend County) | |

The standard overhead service credit is based on using CenterPoint Energy's (CNP) standard installation equipment and includes no overtime premiums. The estimate for standard overhead service is based on installing (3) 250 kVA, pole mounted transformers and associated overhead facilities.

The above cost and attached T&C package are effective for 365 days from the date of this memorandum, provided the field conditions existing as of this date and location of the facilities shown on the attached sketches remain the same. After that time, the T&C package and cost must be reviewed by the Major Underground Department (MUD) before a final commitment is made to Fort Bend County.

Please review the attached T&C package and Facilities Extension Agreement (FEA). Sign the cover sheet of the T&C package and the second page of the FEA. Return these original documents, as well as any required remittance to my office. Note that the information contained in the package is applicable for the life of the service.

The MUD also will require that the Customer sign the cover of the revised T&C package and addendum, and return signed originals to CNP before any inspections of the facilities are requested.

Before beginning the required underground construction, please arrange for a pre-construction meeting with the MUD and Fort Bend County's contractors.

The Customer's requested service arrangement will require an easement from the third-party property owner on whose property a portion of the duct bank would be installed. The Customer shall be responsible for obtaining a written agreement from the third party. The MUD must receive the original written agreement prior to beginning construction. If this contingency cannot be met, the attached T&C package must be revised.

If any additional information is required, contact me at 713-207-6152. Thank you.

Sincerely,

Adewemimo Oyekenu
