Management of Transit Construction Projects

Length: 3.0 Days

Audience:

Managers, planners, and engineers involved in all phases of the management and control of FTA-funded projects. This includes grantee department or division managers responsible for major and non-major capital project development encompassing the planning, design, construction, and post-construction phases; directors of grantee consultant teams participating in the management of a major project; and managers of FTA Project Management Oversight (PMO) consultants. FTA grantees are responsible for managing and directing federally-funded projects.

Description:

Organizations and programs must be ready to address the specific needs of each grantee and each project. The federal transit laws require a grant applicant for a major capital investment project to prepare and carry out a Project Management Plan (PMP) approved by the FTA. This course addresses the basics of good project management for transit projects, with specific emphasis on the requirements that are presented in the report, *Project and Construction Management Guidelines 2003 Update*. The 2003 guidelines reflect many changes in national policies, and project and construction management involves many new techniques and approaches. This course uses the guidelines to teach the process of good project management to grantees with major capital projects who are required to implement Project Management Plans, as well as grantees with smaller capital projects.

Topics:

- Purpose of Project Management Planning
- Organization
- Project Management and Control
- Procurement
- Public Involvement
- Managing Design
- Managing Construction
- Quality Assurance & Quality Control
- Managing Testing and Start-up
- System Operational & Construction Safety

Fee:

Tuition shall be waived for federal, state and local government employees who work in transportation or related areas.

Fee for contractors and consultants: \$450.00

CEU's: 2.2

Telephone: (732) 932-1700

Email: mmoore@rutgers.edu

Welcome, Donald

Paulette,

This course “Management of Transit Construction Projects” looks like it might be worthwhile – do we have funds available to attend?

The October class in Charlotte would be probably be the best for me.

More compelling training classes coming up... particularly “Management of Transit Construction Projects” ...I'd like to go to Alaska, anyone else? Anyone? ;o}

But seriously, all of the classes appear to be useful. If anyone has any interest, please let me know!

Upcoming Courses from NTI

The National Transit Institute is pleased to announce the following upcoming training sessions. Click below for more information on each course or to register:

Courses

[Comprehensive ADA Paratransit Eligibility Course](#)

- May 11-12, 2011 - Pueblo, CO

[Management of Transit Construction Projects](#)

- July 19-21, 2011- New Orleans, LA
- October 24-26, 2011 Charlotte, NC
- September 12-14 - 2011 Portland, OR
- September 20-21 - 2011, Anchorage, AK

[Managing Community Mobility](#)

- May 12-13, 2011 - Detroit, MI

Transit Academy May 15-19, 2011 Dallas, TX

The Transit Academy is a comprehensive, behind-the-scenes study of a major transit system. It is designed to provide those new to transit with an in-depth understanding of the scope of responsibilities, variety of skills and range of activities that work together in delivering safe and efficient transit service. The academy is presented using lectures, demonstrations, hands-on activities and facility tours.
