

ASSE Professional Development
Conference & Exposition

Denver, CO | June 3-6
www.SAFETY2012.org

HIGHLIGHTS

THE #1 SOURCE OF PROFESSIONAL DEVELOPMENT FOR EVERY SAFETY, HEALTH, AND ENVIRONMENTAL PROFESSIONAL

As the pulse of the industry, the American Society of Safety Engineers' SAFETY 2012 Professional Development Conference & Exposition is your source for the knowledge, skills and networking on the important and emerging issues in the safety, health and environmental (SH&E) profession. For more than 100 years, ASSE has a long-standing reputation of delivering high-level, top quality education that you can utilize immediately.

YOUR SOURCE FOR SH&E EDUCATION

Today, SH&E professionals are expected to have expertise in environmental management, ergonomics, industrial hygiene, product safety, Workers' Compensation, construction safety and organizational management, in addition to the more traditional aspects of safety management and engineering. For more than 50 years, ASSE's Professional Development Conference & Exposition has been and will continue to be the direct reflection of what is taking place in the SH&E industry.

Make lasting connections with the people who speak your language and share your day-to-day challenges. Subject your thinking to the best judges around – your peers. They'll tell it like it is, provide immediate feedback and give you something to talk about. You will agree that the relationships and shared knowledge that result from networking are a much added value of the conference experience.

Advance your organization by connecting with the products and services that will take your SH&E programs to the next level. Whether you enjoy the energy of the exhibition floor, filled with a wide range of products, services, technologies and innovations, or if you prefer a one-on-one approach, you will find opportunities and solutions to your organization's needs.

Make plans to attend **SAFETY 2012**

Denver isn't just called the Mile High City, it truly is a mile high. The 13th step on the west side of the State Capitol building is 5,280 feet (1,609 m) above sea level.

LEARN FROM THE BEST

Safety 2012 offers over 200 sessions presented by the best minds in the industry to help you take your skills to the next level. These sessions give you the chance to learn the latest knowledge and trends and walk away with techniques that you can apply in your company today.

ENRICH YOUR EXPERIENCE

Safety 2012 brings a wide variety of perspectives to our attendees through specialized sessions. Sessions are distributed among more than 20 topics identified by experience levels. By tailoring the discipline and experience level you are interested in, you'll be able to tailor your personal conference schedule and better navigate the conference.

CONVERSATIONS THAT MATTER

Participate in these engaging facilitated issue roundtable conversations that explore questions and issues that matter. Be ready to share your ideas, challenges and successes. Conversations are tailored to specific areas of interest.

▶ RUN WITH THE BIG BOYS AND GIRLS

As professionals face new challenges and opportunities, it is important for your executive leaders to understand and appreciate the true drivers of SH&E. Learn essentials from world-renowned leaders such as, CEOs, presidents and vice presidents, and their perspectives of SH&E at the Executive Summit Panel. The Summit examines points of high impact that have the potential to change the way you communicate your SH&E initiatives to executive management. If you want to explore complex issues and hard questions, join these leaders for this thought provoking session. Last year's panelists were from Boeing, CITGO, Commonwealth Edison Company, Dow Chemical and Limbach Facility Services.

▶ ASK THE FEDS

Your Federal officials in Occupational Safety and Health are invited to share their insights and respond to questions from our panel moderator that address key issues and concerns on activities that impact regulatory, standards development and compliance assistance efforts. Whether you agree or disagree with their views, this is information that impacts all SH&E professionals.

▶ LATEST RESEARCH

ASSE's poster sessions highlight recent SH&E research, communicate best practices and identify emerging issues relevant to the profession.

SAFETYNET

Don't wait until you're onsite to figure out who you want to see. Use SafetyNet, ASSE's own online social network to connect with attendees and exhibitors. Access contacts right after you register for the conference.

▶ SEND MESSAGES

Search for and communicate with other attendees and exhibitors. For questions that can't wait for onsite chat or to follow-up with exhibitors after the show, send them a message through SafetyNet. These messages go straight to attendees or the company contact who is managing the booth.

▶ CHECK YOUR IN BOX

Find out about the latest Safety 2012 news and events. Attendees and exhibitors may send you a message or respond to a message you've sent them.

▶ SESSION EVALUATION

We value your feedback. You can complete all of your session evaluations in SafetyNet (as well as through your smart phone or laptop).

700 Fourteenth Street
Denver, CO 80202
