## Cell Phone Investigations™

### Dates

10-4-2012 - 10-5-2012

Course start time: 8:00:00 AM

### Course Location

Arapahoe County Government  
13101 E. Broncos Pkwy  
Centennial, CO 80112

TRAVEL to Centennial Colorado & Englewood, Colorado

### Instructor

Aaron Edens

### Instructor Bio

Aaron Edens is police officer in Northern California for the last 12 years. He spent six years as an Intelligence Unit Detective assigned to the FBI-Joint Terrorism Task Force. During that time he investigated international terrorism and Southwest Asian organized crime and major narcotics trafficking. Officer Edens has been a certified mobile phone examiner since 2005 and has completed over 800 forensic examinations. Officer Edens has taught mobile phone investigative techniques to thousands of law enforcement officers, analysts, and attorneys.

Aaron lives in Northern California with his wife and family.

### Course Description

Almost every criminal investigation involves a cell phone. The evidence needed to arrest and convict is contained on the device itself, the records of calls kept by the cell phone company, and in the cell towers covering the crime scene.

The course covers the search and seizure basics specific to mobile devices, determining what information is available from the cell phone companies and how to obtain it, how to recover digital evidence and intelligence from the handset using free software tools, and how to avoid legal landmines.

This class is designed for law enforcement officers at any stage in their career. Experience or training in cell phone investigations is not required. Students will receive samples of search warrant templates, comprehensive guides to major cell phone carriers, model report language for cell phone searches.

Day One:

**Search and Seizure** - Phones and phone company records

**Search Warrants, Court Orders, and Subpoenas** - How to write them

**Investigating a Phone Number** - From beginning to end

**Who to Contact** - When cellular companies fail to produce the records

**"Blocked" Phone Numbers** - How to obtain calling cards and "dropped" phone numbers

**International Call Records** - what to do when your suspect calls overseas

**Disposable or "Burner" Phones** - What to do with them and how to investigate them

Day Two:

**Remotely Deleting Data** - Preventing it

**Cell phone handsets** - Obtaining physical evidence from the device, how to recover deleted information

RE: Training  
Date: 7-5-2012

Cell Phone Investigations  
10-4-2012 – 10-5-2012

Arapahoe County Government  
13101 E. Broncos Pkwy  
Centennial, CO 80112

I am schedule to attend training October 29 – November 9 in Hoover Alabama. It is unknown when I will know if I have been accepted for the training. This is the course that is paid for through the US Secret Service. This particular course is an in depth course for cell phone investigations and I think the cell phone course in Colorado will compliment the training in Hoover Alabama.

The training in Colorado would require the training fee, flight and car rental. The training in Alabama would not require expenditures.

If possible I would also like to attend the training in Colorado.

✓ 7/5/12 - BASED ON THE USE OF CELL PHONE TECHNOLOGY IN A MAJORITY OF CASES, I FEEL THE COURSE WOULD BE IMPORTANT TO THE DA'S OFFICE AND I WOULD RECOMMEND D.L.'S ATTENDANCE. HE COULD PASS THE LESSONS LEARNED TO THE OTHER INVESTIGATORS IN OUR OFFICE UPON HIS RETURN. THIS INFORMATION WOULD ALSO BE OF VALUE TO OUR PROSECUTORS IN THEIR CASE PREPARATION AS WELL.

THANKS FOR THE CONSIDERATION,

*Bruce*

## POLICE TECHNICAL

superior training for law enforcement in computer applications, online investigations, and forensics

## Cell Phone Investigations™

*The National Standard for Cell Phone Investigation, from Collection to Prosecution*

### Course Overview

Almost every criminal investigation involves a cell phone. The evidence needed to arrest and convict is contained on the device itself, the records of calls kept by the cell phone company, and in the cell towers covering the crime scene.

The course covers the search and seizure basics specific to mobile devices, determining what information is available from the cell phone companies and how to obtain it, how to recover digital evidence and intelligence from the handset using free software tools, and how to avoid legal landmines.

This class is designed for law enforcement officers at any stage in their career. Experience or training in cell phone investigations is not required. Students will receive samples of search warrant templates, comprehensive guides to major cell phone carriers, model report language for cell phone searches,

### Day One

The legal foundation for proper search and seizure of phones and phone company records

Writing effective search warrants, court orders, and subpoenas

How to investigate a phone number from beginning to end, using free and open source tools

Who to contact when cellular companies fail to produce the records in a timely

How to obtain "blocked" caller identification phone numbers

Dealing with suspects who use calling cards and what to do when your suspect "drops" their phone number

International call records-what to do when your suspect calls overseas

Disposable or "burner" phones-why they aren't as bad as most people think and how to investigate them

### Day Two

How criminals use free and low cost tools to conceal evidence and remotely delete the contents of their phones and how to prevent it from happening during your investigation

Cell phone handsets: Obtaining physical evidence from the device, what types of digital evidence are available, where to find and how to recover deleted information

Dealing with locked phones. Security code bypass techniques and how to still recover evidence when they don't work

Where to find and how to use free and low cost tools when the expensive forensic devices don't work,

How to enhance low quality cell phone videos

How to properly utilize 'hidden' EXIF data found in almost every cell phone photograph, and determining location if the GPS was turned off.

How to properly request and use cell tower data in your investigations to locate suspects, fugitives, and missing persons.
