Course ID: BCERT

Title: Basic Computer Evidence Recovery Training

Description: Basic Computer Evidence Recovery Training

Introduction to BCERT

BCERT is a course designed to train first responders to successfully respond to and process a computer crime scene in a home or business environment involving either a Windows or

Unix operating system. Instruction is dynamic, flexible, and focuses on hands-on training.

BCERT is a five-week course designed to provide hands-on experience with computer hardware, device imaging solutions, forensic analysis tools, legal issues and report generation for law enforcement officers performing as cyber incident responders and digital evidence examiners. The course combines instructor-led discussions and practical exercises to teach methodologies and techniques used during investigations involving digital evidence.

BCERT training familiarizes students with:

• Legal aspects of incident response procedures

• Techniques for search and seizures

• Methods and tools necessary to successfully gather volatile information

• Evidence processing and handling

• Media imaging
