What is CEIC (Computer and Enterprise Investigations Conference)?

It's no exaggeration to say that CEIC is the biggest digital-investigations conference of its kind and the only one to offer hands-on lab sessions and training for practical skills development. From sessions on acquiring evidence from mobile devices to international e-discovery to cyber security intelligence, there's simply no other training or seminar series available that packs so much relevant and practical information from so many expert speakers into a four-day period.

*It's a **cybersecurity conference** where incident responders and information security specialists meet up with their fellow experts from around the world to network and learn the very latest security tactics.*

*It's a **legal technology** conference where inside counsel and litigation support staff learn how to collaborate with information security professionals prior to litigation.*

*It's a **digital forensics conference** where everyone from beginning forensic investigators to the best of the best learn different and better methods that take their professional capabilities to a whole new level.*

CEIC is the only digital investigations conference offering **training sessions for Spanish speakers**, by Spanish speakers, centered around concerns voiced by Spanish speakers.

Who Should Attend:

- Digital Forensic Examiners
- E-Discovery Lawyers
- Litigation Support Professionals
- Cyber Security Professionals
- Incident Responders
- Compliance and Risk Managers
- E-Discovery Practitioners
- Information Security Personnel
- Law Enforcement

Session #11 – 10:15am -11:45am

Program Changes:

We work very hard to assemble a top-notch, cohesive, educational program; however, despite our best efforts, faculty and program schedules may change. Unanticipated or last minute changes to the program happen. Speakers may cancel without sufficient notice to allow us to engage a substitute. We do our best to keep these at a minimum. We will keep you informed of any unavoidable changes via email and through on-site updates.
