**ATTACHMENT 4  
SCOPE OF WORK & COMPENSATION  
FOR THIRD PARTY OCR IMPLEMENTATION**

TransCore has decided that the best third party OCR solution to add to the current Fort Bend system is the Carmen FreeFlow LPR OCR engine. The Carmen FreeFlow software licensing is based on the Server/Processor the software is running on. The servers we are running are quad core processors so we need quad core LPR OCR software runtime licenses. We will have to add their Carmen PCI express card config .173 to each of the servers as well.

The way we will need to configure this for the Fort Bend system is by roadway (at the Plaza level) so (3) licenses and (3) PCI cards. The PCI card is required because it is what Carmen uses to enforce licensing compliance.

TransCore is also recommending that we modify the Infinity PPS database processes to switch from using Infinity IRE for majority voting logic, to using the majority voting logic we developed and have successfully implemented for the other Texas and Oklahoma tolling projects.

**Pricing:**

ITEM	DESCRIPTION	PRICE
2	(3) OCR-FFQ Carmen FreeFlow LPR software runtime license (3) FXMC-PCI-EXP PCI Express Card NNC hardware key -- config.173	\$41,775.90
	<b>Implementation Total</b>	<b>\$41,775.90</b>

TransCore will charge Fort Bend \$41,775.90 for the OCR License and hardware keys since this to help bring the system into the OCR accuracy requirements. TransCore will not charge the Authority for the development and testing.
