The agenda for Judge's late May trip is two-fold:

(1) Work and meet with our Congressional Delegation in support of the inclusion of the County's BREM project into the Water Resources Development Act authorization that is scheduled to be marked up in the House the week of May 23.

(2) Work and meet with the offices Congressmen Olson and Babin and the House Highways and Transit Subcommittee and with Senator Cornyn's staff and the Senate Banking Committee in support of the Federal Transit Administration recognizes the Section 5307 changes that were included by the Congress in its recent authorization of the FAST Act but which have not been recognized by the Federal Transit Administration in the Interim Guidance it issued recently.

These two priorities will result in several meetings with both the House and the Senate personal and committee staff.
