Course description

This 10-day course focuses on supervisory management practices as they relate to Emergency Medical Services (EMS) in the fire service. This interactive and fast-moving course will enable participants to deal more effectively with day-to-day management issues that supervisory-level managers are likely to encounter. Personnel, resource management, and quality improvement techniques are some of the major components of this course. Upon completion of this course, the students will be able to enhance the quality and overall effectiveness of their EMS operation through the use of management techniques.

Selection criteria

Individuals with midlevel management responsibility for an EMS delivery system (battalion/division chief, captain, shift supervisor).

Prerequisites

Incident Command System (ICS)-100-level and ICS-200-level training. Preferred courses are Q0462 and Q0463, available through NFA Online at www.usfa.fema.gov/training/nfa/courses/online.html. Chief's signature attests that the applicant has completed this required training.

Comments

This class is a great tool for any management position. It will help me in future promotional exams...The class passed my expectations, even though I had talked to other people who had taken it. The materials presented in the class will be very helpful in my work and helping move our EMS system forward...I will be able to bring some of the best practices from around the country back to my department.
