* Requested Grant Amount	\$6,534.00
* Identify the organizational type for this request (check all that apply):	Municipality (City, County, Tribal, First Nations, Metis, or Inuit entity)
* Does your organization own the shelter facility in which you operate?	Yes
* What is your shelter's annual animal intake?	3500
* Please provide organization's revenue as reported on current year 990 (T3010 for Canada)	\$1,341,425.00
* Please describe the project for which you are seeking support	This project is to provide flea/tick medication for the population at the shelter for an average of 3 months during the most prolific tick period in Houston. Last year, the problem was so horrific that some dogs looked like they had scales on them when in fact it was an army of ticks.
* What will be the impact of this project?	Currently we use topical flea/tick preventative on intake but for the pets whose length of stay sometimes exceeds 90 days, we need something else to protect them, particularly during the tick season in Texas. Being able to provide flea/tick medication for our pets who stay with us long-term improves their health and well-being as well as improves their adoption chances. While we do treat the kennels and grounds, we do not have the budget to treat individual pets over time.
