1. Flares attached to signs where shown are REQUIRED.
2. All traffic control devices illustrated are REQUIRED, except those denoted with the triangle symbol may be omitted when placed elsewhere in the plans, or for routine maintenance work, when approved by the Engineer.
3. Inactive work vehicles or other equipment should be parked near the right-of-way line and not parked on the paved shoulder.
4. A Showup Vehicle with a TMA should be used anytime it can be positioned 30 to 100 feet in advance of the work zone and should be clearly visible to approaching traffic. The vehicle's work lights are required to be on at all times. The vehicle should be equipped with a TMA and a longer present but road work conditions require the traffic control to remain in place, Type 3 barricades or other channelizing devices may be substituted for the Showup Vehicle and the TMA. The Showup Vehicle should be positioned in the work zone, not on the paved surface, except to those shown in order to protect work areas.
5. Use TCS-11 for shoulder work on divided highways, expressways and freeways.
6. TCS-15 SHOULDER WORK signs may be used in place of CNO-10 SHOULDER WORK signs for shoulder work on conventional two-lane roadways.

For construction or maintenance contract work, specific project requirements for shadow vehicles can be found in the project GENERAL NOTES for Item 502, Barricade Stacks and Traffic Handling.
