Courtney,

Yes, just trying to catch back up. I actually didn't get back until yesterday instead of Monday. Fortunately, Phil and I have been working with AT&T on this one. They have included everything that we need. I know that Richard Stolleis wants to make sure that this permit includes language that it is only for work within the toll road right of way and does not permit the crossing the river. AT&T knows that they must get other entity approvals to cross the river.

Thanks,
Gary

Hello Gary, The above referenced permit is actually in association with the previous 2018-20467 that we were discussing. Can you please review this one.

"AT&T Texas will performing a directional bore under the Brazos River at HWY 99. Originally they had an aerial crossing river but now they will be crossing the river with 3-4" HDPE in a 12" steel casing."

Thank you.

Alright J.C., I got an answer on this Permit.

I will be approving it with the understanding that this Permit 2018-21150 is for work within the toll road right of way and does not include the crossing of the river and that AT&T understands that they will have to get the approval of other entities in order to cross the river.

If you will **respond to this email** with your understanding I will move this permit forward.

Thank you for your patients and let me know if you need anything else.

Figure 1 is a line graph showing the number of cases of COVID-19 in the United States from March 2020 to March 2021. The y-axis is labeled 'Number of cases' and ranges from 0 to 1,000,000. The x-axis is labeled 'Date' and shows months from March 2020 to March 2021. The graph shows a sharp increase in cases starting in March 2020, peaking in May 2020 at approximately 1,000,000 cases, followed by a decline and then a second, smaller peak in November 2020 at approximately 200,000 cases. Cases then decline again, with a small uptick in March 2021.
