Currently we are running at 95% guarantee on turnaround times. In addition to tracking statistics, NMS Labs holds a daily afternoon meeting with all department heads to discuss any problems that may have arisen throughout the day that would affect the turnaround times. NMS Labs makes every effort to streamline all aspects of testing within the laboratory in order to give our clients the best possible turnaround times.

NMS Labs's current production schedules support an expected average turnaround time of 10 days after receiving samples for analysis of our routine postmortem toxicology panels. NMS Labs will make every effort to handle every case received from the Fort Bend County Medical Examiner's Office in an expeditious manner. We are committed to excellence in the turnaround time and delivery of the final report to our forensic clientele, which is demonstrated through rigorous monitoring of our current and historical performances.

\* The new Novel Psychoactive Substances (NPS) have created challenges for all laboratories due to their evolving development and discontinuations. NMS Labs is constantly evaluating information from the media, drug user forums, and casework to identify NPS which may be of interest and develop mechanisms to report these findings to our clients when appropriate. In addition to the compounds listed above, NMS Labs has identified several additional NPS substances that that may be detected in case work.

As an example, as of 10/15/18, NMS Labs has identified Bromazepam, Delorazepam, Deschloroetizolam, Flubromazepam, Meclonazepam, Pyrazolam, 25B-NBOME, 25C-NBOME, 25I-NBOME, 3-Fluorophenmetrazine, 3-MeO-PCP, Ethylone, Butylone, Pentylone, N-Ethyl Hexedrone, 4-Chloro-Alpha-PVP, alpha-PHP, MPHP, U-49900, U-48800/U-51754, Cis/trans 3-Methylfentanyl, Cyclopropylfentanyl, m/p-Methylmethoxyacetylfentanyl, Methoxyacetylfentanyl, p,o-Fluorofentanyl, Tetrahydrofuranfentanyl, and Valerylfentanyl as compounds that may be detected in cases. In situations where NMS Labs may detect the possibility of these compounds, the client will be notified and may consult with us on the most appropriate approach given the case history and testing capabilities at the time. It is expected that with our dedicated approach to identifying NPS of interest, this list of compounds will be dynamic and should change over time.
