

Ike Akinwande is a licensed Professional Structural Engineer (S.E.) and Professional Engineer (P.E.). He has spent his entire 17-year career in the civil and structural industry working in the management, design, and construction of buildings, bridges, and roads. Ike is passionate about applying technological solutions to managing infrastructure and helping to push the industry forward. As a former college professor and Oklahoma City Downtown Commissioner, he brings a situational leadership approach to solving problems and accomplishing an organization's mission.
