Re: Addendum Proposal for Construction Materials Engineering and Testing Services

HVJ No. HC2010394

Dear Mr. Slawinsky,

As requested, this is our cost estimate for an addendum to our contract for material testing and inspection services for the referenced project.

Scope of Services

Our scope of services for the referenced addendum proposal will include the following items.

- Monitoring backfill of utilities, and testing backfilled materials
- Inspecting and testing roadway subgrade, and stabilized subgrade
- Concrete testing for pavement and sidewalks
- Associated laboratory testing

Cost Estimate

The estimated cost to perform the material testing services for the remaining work on this project is estimated to \$23,187.5 as shown on the attached breakdown. The estimate for our services is based on the remaining work information you provided. However, we do not see our scope of testing involved more than above services we mentioned.

As the schedule and frequency of requests are beyond our control, we cannot guarantee that the estimate provided would be adequate to provide the services needed throughout the entire duration of the construction. This is an estimate for services based on the available information about the work on the project. This amount may be revised if additional work is added or construction schedule is extended. HVJ Associates, Inc. will monitor the budget as the work proceeds and will keep you or your designated representative informed.

Scheduling of our personnel for this project will be at the request of you or your designated representatives. We require at least 24 hours notice prior to providing on-call personnel to ensure proper scheduling of work.
