U.S. Army Corps of Engineers (USACE)

APPLICATION FOR DEPARTMENT OF THE ARMY PERMIT

33 CFR 325. The proponent agency is CECW-CO-R.

Form Approved -OMB No. 0710-0003 Expires: 01-08-2018

The public reporting burden for this collection of information, OMB Control Number 0710-0003, is estimated to average 11 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or burden reduction suggestions to the Department of Defense, Washington Headquarters Services, at whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. PLEASE DO NOT RETURN YOUR APPLICATION TO THE ABOVE EMAIL.

PRIVACY ACT STATEMENT

Authorities: Rivers and Harbors Act, Section 10, 33 USC 403; Clean Water Act, Section 404, 33 USC 1344; Marine Protection, Research, and Sanctuaries Act, Section 103, 33 USC 1413; Regulatory Programs of the Corps of Engineers; Final Rule 33 CFR 320-332. Principal Purpose: Information provided on this form will be used in evaluating the application for a permit. Routine Uses: This information may be shared with the Department of Justice and other federal, state, and local government agencies, and the public and may be made available as part of a public notice as required by Federal law. Submission of requested information is voluntary, however, if information is not provided the permit application cannot be evaluated nor can a permit be issued. One set of original drawings or good reproducible copies which show the location and character of the proposed activity must be attached to this application (see sample drawings and/or instructions) and be submitted to the District Engineer having jurisdiction over the location of the proposed activity. An application that is not completed in full will be returned. System of Record Notice (SORN). The information received is entered into our permit tracking database and a SORN has been completed (SORN #A1145b) and may be accessed at the following website: http://dpcld.defense.gov/Privacy/SORNsIndex/DOD-wide-SORN-Article-View/Article/570115/a1145b-ce.aspx

477	DIDEAT	0.10	300	THE	OITE
17.	DIRECT	IUNS	10	IHE	SIIE

From Galveston take State Highway 6 north towards Missouri City. Travel on Hwy 6 for 41.6 miles, turn right onto Farm to Market 521 and travel 1.3 miles north and turn left onto West Sycamore Road. The project site constitutes the next 0.72 miles of West Sycamore Road.

18. Nature of Activity (Description of project, include all features)

The Applicant is proposing to expand and improve an existing section of West Sycamore Road, totaling 0.72 miles as well as add a storm water detention pond. The total area investigated and included within this Project Area is 0.72 linear miles by 100 feet wide or 24.94 acres of undeveloped and developed land. The proposed project will avoid 0.67 acres of jurisdictional wetlands and impact 3.47 acres of jurisdictional wetlands for the purpose of constructing the expansion and improvement of West Sycamore Road and its associated storm-water drainage amenities, and necessary utility lines.

19. Project Purpose (Describe the reason or purpose of the project, see instructions)

The overall purpose of the project is to provide additional safe transportation options to meet the growing population in this region of Fort Bend County, Texas. The construction of this proposed roadway will provide the residential and local community new access to major roadways. Currently, there are a limited number of major transportation routes which connect these communities to the greater Fort Bend County area, and construction of this project would alleviate traffic congestion. In an emergency situation, such as river flooding or a hurricane, the proposed project would provide much needed ingress and egress options and allow safe alternatives to existing thoroughfares. This project is specifically designed to be built above the FEMA 100-year floodplain in order to remain open even during catastrophic weather events.

USE BLOCKS 20-23 IF DREDGED AND/OR FILL MATERIAL IS TO BE DISCHARGED

20. Reason(s) for Discharge

Impacts to 3.47 acres of jurisdictional forested wetlands are associated directly with the expansion of the existing roadway and the installation of the storm water detention facilities necessary for the project. Not improving the storm water drainage features is unfortunately not an option due to Fort Bend County Drainage District requirements.

21. Type(s) of Material Being Discharged and the Amount of Each Type in Cubic Yards:

Amount in Cubic Yards

Clean earthen fill material - 172 CY

22. Surface Area in Acres of Wetlands or Other Waters Filled (see instructions)

Acres 3.47

or

Linear Feet

23. Description of Avoidance, Minimization, and Compensation (see instructions)

The Applicant has chosen a project design which avoids a total of 0.67 acres of jurisdictional wetlands and minimizes impacts to non-vegetated waters of the U.S. The Applicant has avoided and minimized impacts to the most practical extent while still meeting the minimum needs of the project; and will compensate for unavoidable impacts through the purchase of mitigation credits from an approved mitigation bank.
