BY: FM230062

- NOTE:
1. Extend the fiber into the MDF, which is located 200' away.
  2. Splice (144) strand fiber cable to an existing (144) strand fiber cable, single mode, currently located in a manhole.
  3. Terminate fiber into a rack mounted fiber enclosure in the MDF side.
  4. The conduits stub into the MDF and the distance from the conduits to the rack is about 50'.
  5. Perform all pre-testing, post install testing, and all final testing needed to ensure system is fully operational.
