

Cybersecurity Awareness Training Completion Update:

MANDATORY TRAINING: The County is diligently working to ensure that All Staff are compliant with Texas House Bill (HB) 3834 and 1118. It requires that all Employees and Elected Officials of a local or state government entity complete cybersecurity awareness training annually. The cybersecurity training awareness course prepares and tests on the various tricks that bad actors could use to break into the County network and servers, as well as many other County applications. This training is essential for the continued safety and security of our County technology infrastructure. County IT is required to report the cybersecurity awareness training course completion rate to DIR using the training window of June 15, 2022 – June 14, 2023.

Non-Compliance will have an adverse impact on County programs, personnel, and operational continuity.

We ask that All Staff have the required cybersecurity awareness training completed by **Saturday May 20, 2023**. Employees who do not have direct access to a computer to complete the training may come to either the Information Technology or Human Resource offices to take the training there.
