General Information

1. Describe the proposed project(s) for which the funds will be used. *

This grant replaces 5339-D-2020-FT BEND-00007. The balance of funds remaining in the aforementioned grant are now being awarded in 5339-D-2020-FT BEND-00267.

Fort Bend County (FBC) will use funds to purchase vehicles.

FBC provides general public demand response and commuter services. All services operate Monday through Friday (excluding County Holidays). Demand Response services operate to accommodate the first drop-off by 8:00 am and last pick-up by 5:00 pm. Demand Response trips are provided within the County limits and/or to destinations in adjoining counties within one (1) mile of the Fort Bend County line. Advanced reservations are required and can be requested up to thirty (30) calendar days in advance. Requests are taken on a first-come, first-serve basis.

FBC provides additional services such as the Ambassador Program wherein passenger assistants help passengers with disabilities to and from their destinations. FBC continues to plan with human service agency transportation providers within the county and continues to stay involved in the region's public transportation efforts.

Commuter services are provided to Greenway Plaza, Galleria, and Texas Medical Center areas of Houston from park and ride locations in Sugar Land and Rosenberg. FBC has a planned park and ride facility along the Westpark Toll Road in northwest Fort Bend County. The Westpark Park and Ride will provide transportation for commuters residing in the northern portion of Fort Bend County. The transportation route will promote access to job sites, education, job training and other destinations.

FBC is seeking funds with TDC's as a match for the purchase of replacement vehicles as well as miscellaneous equipment (bus wraps). The vehicles being replaced have either exceeded useful life and/or displaying signs of engine deterioration and facing high emissions maintenance costs.

2. Provide a description of how the need/demand for the proposed project(s) was determined. *

Vehicle replacements support the continuation of existing public transportation services by ensuring transportation provided to individuals and families is safe, efficient and reliable. The mechanical and operating condition of vehicles is reviewed regularly and tracked. A replacement plan is maintained to ensure vehicles that have reached useful life or not working properly are replaced timely.

3. Describe the anticipated benefits of the project. *

FBC services bring a better quality of life to individuals, families, communities, and businesses from every walk of life by providing options to get to work, go to school, visit friends, or get to a doctor's appointment.

This project will not only directly reduce emissions by eliminating passenger vehicles but reduce emissions by alleviating congestion on the road. This project will also decrease the agency's maintenance cost and maintain quality transportation for riders.
