All employees of Engineer shall have such knowledge and experience as will enable them to perform the duties assigned to them. Any employee or agent of Engineer who, in County's opinion, is incompetent or by his conduct becomes detrimental to providing Services pursuant to this Agreement, shall, upon request of County, immediately be removed from association with the Services required under this Agreement.

When performing Services on-site at County's facilities, Engineer shall comply with, and will require that all Engineer's Personnel comply with, all applicable rules, regulations and known policies of County that are communicated to Engineer in writing, including security procedures concerning systems and data and remote access thereto, building security procedures, including the restriction of access by County to certain areas of its premises or systems for security reasons, and general health and safety practices and procedures.

Re : Proposal for Professional Engineering Services
5th Street Water and Wastewater Master Plan 2025 Update
Fort Bend County, Texas

Dear Mr. Meyers:

Quiddity Engineering, LLC (Quiddity) is pleased to present this Proposal for Professional Engineering Services to Fort Bend County Precinct 3 (the County) for the 5th Street 2025 Water and Wastewater Master Plan. It is understood that this Proposal will be utilized, referenced, and incorporated as "Exhibit A" within the County's short form: "Agreement for Professional Engineering Services".

Project Understanding:

Quiddity understands the County desires to better understand the existing conditions, future development, and resultant necessary water and wastewater Capital Improvements Projects (CIP) for the 5th Street Water Supply Corporation (FSWSC) served by Fort Bend County Water Control & Improvement District No. 2 (FBC WCID2).

Jones & Carter, Inc. (now Quiddity Engineering, LLC) previously completed the 2018 Water and Wastewater System Analysis for Fifth Street Water Supply Corporation, dated September 18, 2018. As of December 2024, the majority of the previously known developments have concluded, and more than half of the CIP projects outlined have been completed or are underway and anticipated to be completed in 2025. Quiddity maintains a Geographic Information System (GIS) database of the water and wastewater utilities within FBC WCID2, including the FSWSC service area.

Quiddity will collect updated existing water usage and wastewater contribution demand data, re-evaluate known proposed development, provide projected water usage and wastewater contribution data for undeveloped or redeveloping tracts, analyze and determine needed water and wastewater system improvements and provide an updated CIP within a *Fifth Street Water and Wastewater Master Plan* for the FSWSC.

Additionally, Quiddity proposes to develop exhibits, specifications, and a bid package that could be utilized by the County and/or FBC WCID2 to solicit a construction Contractor for sanitary sewer cleaning and televising (C&TV) and smoke testing. The FSWSC wastewater system consists of approximately 14,000 linear feet (LF) of 8-inch, 3,800 LF of 10-inch, and 1,400 LF of 18-inch gravity sanitary sewers. The C&TV (construction) effort could be performed before, during, or after completion of the Master Plan. Receiving the post-completion C&TV data before finalizing the Master Plan would further inform the study to be more accurate with gravity sanitary sewer system rehabilitation needs.

Based on our understanding of the project, we have prepared the following scope of services and compensation proposal for your consideration.

Mr. Andy Meyers

SCOPE OF WORK:

Task 1 – WATER AND WASTEWATER MASTER PLAN

Task 1.1 – Data Collection and Analysis - This task includes the following items:

- a) Conduct Kickoff Meeting with the County and FBCWCID 2 to review project goals, stakeholder role, and discuss data requests and necessary information to complete the project (meeting to be held virtually by MS TEAMS).
- b) Collect, organize, and analyze the following information from FBC WCID2 {to be coordinated and obtained by Quiddity with a confirmation request email of the need from the County}:
 - i) Historical Monthly water meter usage, connection counts and type, and/or aggregate system metered demand for the last 36 months for the water meters within FSWSC service area.
 - ii) Historical Daily treated water supply production for the last 36 months for FBC WCID2.
 - iii) Historical connection and wastewater contribution for the Lift Station Service Areas for the last 36 months. This will be accomplished by comparing regional water data with Lift Station pump Elapsed Time Meter (ETM) run time data compiled over the last 36 months and referring to the known or FBC WCID2 provided pump manufacturer make and models and/or pump curves for the lift stations.
 - iv) Proposed FSWSC water system infrastructure plans and proposed known development plans.
 - v) Develop Water demand and Wastewater contribution projections for undeveloped and re-developing tracts.
 - vi) Review and update the FSWSC service area of the existing FBC WCID2 GIS system. Pending consent by FBC WCID2, provide a copy of the ESRI shapefiles of water and wastewater infrastructure to the County.

Deliverables for Task 1.1:

- Existing Condition and Projected “Build-out” Condition - Land Use, Water Demand, and Wastewater Contribution Exhibit (PDF Format).
- GIS database shapefiles of existing water and wastewater infrastructure.

Task 1.2 – Computer Hydraulic Water Model Analysis- This task includes the following items:

- a) Utilize and update the previously completed computer hydraulic pressure model of the water system in WaterGEMs Connect Edition using data to be provided by the County and FBC WCID2. The modeling effort will follow procedures, practices, and methodologies outlined in AWWA M32 – Computer Modeling of Water Distribution Systems.
- b) Perform field flow testing to document existing hydraulic conditions and utilize the data for re-calibration of the FSWSC service area.
- c) Utilize the hydraulic model to analyze the existing and proposed system under a single pressure plane with a maximum of six (6) scenarios as described hereon and follows:
 - i) Existing Condition: Average Daily Demand (ADD), Maximum Daily Demand (MDD), & Fire Flow Conditions (FF).
 - ii) Proposed Build out system: ADD, MDD, & FF.

Deliverables for Task 1.2:

- WaterGEMs Exhibits of input parameters for Conditions (i) and (ii) consisting of color-coded maps of pipe diameters and elevations (PDF Format).
- WaterGEMs Exhibits of output results for the six (6) scenarios described consisting of color-coded maps of pipe velocity and resultant pressures.

Task 1.3 – Wastewater System Desktop Analysis - This task includes the following items:

- a) Provide layouts of the lift station service areas, including gravity sewer and force main sizes.
- b) Prepare a lift station flow diagram, detailing the path of wastewater flow through the system.

- c) Prepare Lift Station existing and proposed capacity calculations. Check upstream and downstream gravity sanitary sewer and force main sizes versus capacities needed.
- d) Utilize the completed lift station service area maps, lift station flow diagrams, and lift station calculations to determine the existing and proposed wastewater system condition.

Deliverables for Task 1.2:

- Exhibits of Lift Station Service Areas and Flow Diagram (PDF Format)

Task 1.4 – Fifth Street Water and Wastewater Master Plan - This task includes the following items:

- a) Review and analyze contractual limitations and obligations for water service between FSWSC and FBC WCID2.
- b) Utilize the data collected in Task 1.1 and the analyses completed in Tasks 1.2 and 1.3 to determine the scope of water and wastewater infrastructure improvements necessary to meet the existing and future water and wastewater needs of FSWSC.
- c) Prepare Association for the Advancement of Cost Engineering (AACE) Class IV Engineer's Opinion of Probable Construction Cost (EOPCC) for the determined CIP projects. Cost Estimates provided will include exhibits detailing the scope of work of each project, assumptions made, and other relevant items the County may need to know such as the potential need for easements or land acquisition.
- d) Conduct a Draft Report and CIP review Meeting with the County (meeting to be held virtually by MS TEAMS).
- e) Provide a **Water and Wastewater Master Plan Report**.

Deliverables for Task 1.4:

- Fifth Street Water and Wastewater Master Plan (PDF Format).

Task 2 – SANITARY SEWER CLEANING AND TELEVISIONING AND SMOKE TESTING BID PACKAGE

Task 2.1 – Develop a Sanitary Sewer Cleaning & Televisioning and Smoke Testing construction bid package - This task includes the following items:

- a) Develop overall plan layout Exhibits of the proposed C&TV and Smoke Testing limits based on FBC WCID2 provided GIS.
- b) Prepare signed and sealed bid package, including bid form, specifications, and Exhibits of the scope of work. It is understood the County and/or FBC WCID 2 will utilize this bid package to solicit construction contractors to perform the work.

Deliverables for Task 2.1:

- Sanitary Sewer Cleaning & Televisioning and Smoke Testing construction bid package (PDF Format).
