Term Contract Renewal Form

Solicitation #: Bid 24-049

Title: Term Contract for the Purchase of Traffic Signs, Posts and Supplies

Contracted Vendor: Core Products, LLC

Ms. McDonald,

Our contract with your company for the above referenced expires March 31, 2025. Contract provisions allow for renewal of this contract if mutually agreeable.

If your company wishes to renew this contract through March 31, 2026 under the same terms and conditions, please complete the information below and return this form along with a Form 1295 by e-mail to krystle.sanchez@fortbendcountytexas.gov. Purchasing will then take the matter before the Commissioner's Court of Fort Bend County for their consideration. Please respond to this email by 5:00 pm, Monday, December 30, 2024.

☒ Yes, I agree to renewing our agreement with Fort Bend County under the same terms and conditions.

☐ No, I do not wish to renew our agreement with Fort Bend County.

If Yes, please provide a new Form 1295 along with this renewal form by replying to this email. The Form 1295 must be new; previous 1295s are not permitted.

Effective January 1, 2016 all contracts executed by Commissioners Court, regardless of the dollar amount, will require completion of Form 1295 "Certificate of Interested Parties", per the new Government Code Statute §2252.908. All vendors submitting a response to a formal Bid, RFP, SOQ or any contracts, contract amendments, extensions or renewals are required to complete the Form 1295 online through the State of Texas Ethics Commission website. Please visit:

<https://www.ethics.state.tx.us/filinginfo/1295/>

On-line instructions:

Name of governmental entity is to read: Fort Bend County.

Identification number used by the governmental entity is: B24-049.

Description is to read: Purchase of Traffic Signs, Posts and Supplies.

After receiving the Form 1295 with a new Certification Number and Date Filed, please print the form and complete box 6, sign, then email the Form 1295 and this signed Term Contract Renewal Form to krystle.sanchez@fortbendcountytexas.gov. If your company is publicly traded you are not required to complete this form.

Term Contract Renewal Form

Solicitation #: Bid 24-049

Title: Term Contract for the Purchase of Traffic Signs, Posts and Supplies

Contracted Vendor: Vulcan, Inc. DBA Vulcan Signs

Mr. Beviacqua,

Our contract with your company for the above referenced expires March 31, 2025. Contract provisions allow for renewal of this contract if mutually agreeable.

If your company wishes to renew this contract through March 31, 2026 under the same terms and conditions, please complete the information below and return this form along with a Form 1295 by e-mail to krystle.sanchez@fortbendcountytexas.gov. Purchasing will then take the matter before the Commissioner's Court of Fort Bend County for their consideration. Please respond to this email by 5:00 pm, Monday, December 30, 2024.

☒ Yes, I agree to renewing our agreement with Fort Bend County under the same terms and conditions.

☐ No, I do not wish to renew our agreement with Fort Bend County.

If Yes, please provide a new Form 1295 along with this renewal form by replying to this email. The Form 1295 must be new; previous 1295s are not permitted.

Effective January 1, 2016 all contracts executed by Commissioners Court, regardless of the dollar amount, will require completion of Form 1295 "Certificate of Interested Parties", per the new Government Code Statute §2252.908. All vendors submitting a response to a formal Bid, RFP, SOQ or any contracts, contract amendments, extensions or renewals are required to complete the Form 1295 online through the State of Texas Ethics Commission website. Please visit:

<https://www.ethics.state.tx.us/filinginfo/1295/>

On-line instructions:

Name of governmental entity is to read: Fort Bend County.

Identification number used by the governmental entity is: B24-049.

Description is to read: Purchase of Traffic Signs, Posts and Supplies.

After receiving the Form 1295 with a new Certification Number and Date Filed, please print the form and complete box 6, sign, then email the Form 1295 and this signed Term Contract Renewal Form to krystle.sanchez@fortbendcountytexas.gov. If your company is publicly traded you are not required to complete this form.

Re: Increase Request for #B24-049 Price Increase Request

Vulcan will renew the aforementioned contract contingent upon the City accepting a 5% increase on Section 1 - Complete Signs, 5% increase on Section 2 - Blanks, 5% increase on Section 3 – Posts and Accessories, 5% increase on Section 5 – Carsonite Products, 5% increase on Section 6 – 3M Products, 5% increase on Section 7 – Avery Denison, 5% increase on Section 8 – Cutting Knives, and 5% Increase on Section 9 – Banding Materials. (Proposed Pricing Attached). An increase is needed due to inflation and raw material increases. Attached is the Platts Metals Daily report from the bid opening date, showing a 21% increase in aluminum, as well as the CPI (Consumer Price Index) of 2.7%. The 5% increase will help cover these costs.

We look forward to working with you again!

Regards,

David B. Beviacqua

CONSUMER PRICE INDEX - NOVEMBER 2024

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.3 percent on a seasonally adjusted basis in November, after rising 0.2 percent in each of the previous 4 months, the U.S. Bureau of Labor Statistics reported today. Over the last 12 months, the all items index increased 2.7 percent before seasonal adjustment.

The index for shelter rose 0.3 percent in November, accounting for nearly forty percent of the monthly all items increase. The food index also increased over the month, rising 0.4 percent as the food at home index increased 0.5 percent and the food away from home index rose 0.3 percent. The energy index rose 0.2 percent over the month, after being unchanged in October.

The index for all items less food and energy rose 0.3 percent in November, as it did in each of the previous 3 months. Indexes that increased in November include shelter, used cars and trucks, household furnishings and operations, medical care, new vehicles, and recreation. The index for communication was among the few major indexes that decreased over the month.

The all items index rose 2.7 percent for the 12 months ending November, after rising 2.6 percent over the 12 months ending October. The all items less food and energy index rose 3.3 percent over the last 12 months. The energy index decreased 3.2 percent for the 12 months ending November. The food index increased 2.4 percent over the last year.

Table A. Percent changes in CPI for All Urban Consumers (CPI-U): U.S. city average

	Seasonally adjusted changes from preceding month							Un-adjusted 12-mos. ended Nov. 2024

Food

The index for food increased 0.4 percent in November, after rising 0.2 percent in October. The food at home index rose 0.5 percent over the month. Four of the six major grocery store food group indexes increased in

November. The index for meats, poultry, fish, and eggs rose 1.7 percent over the month, as the index for beef increased 3.1 percent and the index for eggs rose 8.2 percent. The nonalcoholic beverages index increased 1.5 percent in November, after rising 0.4 percent in October. The index for other food at home rose 0.1 percent over the month and the index for fruits and vegetables increased 0.2 percent.

The cereals and bakery products index fell 1.1 percent in November, the largest 1-month decrease ever reported for the index which was first published in 1989. The index for dairy and related products declined 0.1 percent over the month.

The food away from home index rose 0.3 percent in November, after rising 0.2 percent in October. The index for full service meals also rose 0.3 percent over the month as did the index for limited service meals.

The food at home index rose 1.6 percent over the last 12 months. The index for meats, poultry, fish, and eggs rose 3.8 percent over the last 12 months and the index for nonalcoholic beverages increased 2.8 percent. Over the same period, the fruits and vegetables index rose 1.1 percent and the other food at home index increased 0.7 percent. The index for dairy and related products increased 1.2 percent over the year. In contrast, the cereals and bakery products index declined 0.5 percent over the last year, the largest 12-month decline since December 2017.

The food away from home index rose 3.6 percent over the last year. The index for limited service meals increased 3.7 percent over the last 12 months and the index for full service meals rose 3.6 percent over the same period.

Energy

The energy index increased 0.2 percent in November, after being unchanged in October. The gasoline index increased 0.6 percent over the month. (Before seasonal adjustment, gasoline prices decreased 2.9 percent in November.) The natural gas index rose 1.0 percent over the month, after rising 0.3 percent in October. In contrast, the index for electricity fell 0.4 percent in November.

The energy index decreased 3.2 percent over the past 12 months. The gasoline index fell 8.1 percent over this 12-month span and the fuel oil index fell 19.5 percent over that period. In contrast, the index for electricity increased 3.1 percent over the last 12 months and the index for natural gas rose 1.8 percent.

All items less food and energy

The index for all items less food and energy rose 0.3 percent in November, as it did in the preceding 3 months. The shelter index increased 0.3 percent in November. The index for owners' equivalent rent rose 0.2 percent over the month, as did the index for rent, the smallest 1-month increases since April 2021 and July 2021, respectively. The lodging away from home index rose 3.2 percent in November, after rising 0.4 percent in October.

The medical care index increased 0.3 percent over the month, the same as it did in October. The index for physicians' services increased 0.3 percent in November, while the prescription drugs index fell 0.4 percent over the month. The hospital services index was unchanged in November.

The used cars and trucks index rose 2.0 percent in November, after rising 2.7 percent in the previous month. The index for household furnishings and operations rose 0.6 percent over the month as did the index for new vehicles. Other indexes that increased in November include recreation, education, personal care, and apparel. In contrast, the index for communication fell 1.0 percent in November after falling 0.6 percent in October and September.

The index for all items less food and energy rose 3.3 percent over the past 12 months. The shelter index increased 4.7 percent over the last year, the smallest 12-month increase since February 2022. Other indexes with notable increases over the last year include motor vehicle insurance (+12.7 percent), medical care (+3.1 percent), education (+4.2 percent), and recreation (+1.5 percent).

Not seasonally adjusted CPI measures

The Consumer Price Index for All Urban Consumers (CPI-U) increased 2.7 percent over the last 12 months to an index level of 315.493 (1982-84=100). For the month, the index decreased 0.1 percent prior to seasonal adjustment.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 2.6 percent over the last 12 months to an index level of 308.998 (1982-84=100). For the month, the index decreased 0.1 percent prior to seasonal adjustment.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 2.6 percent over the last 12 months. For the month, the index decreased 0.1 percent on a not seasonally adjusted basis. Please note that the indexes for the past 10 to 12 months are subject to revision.

The Consumer Price Index for December 2024 is scheduled to be released on Wednesday, January 15, 2025, at 8:30 a.m. (ET).

Consumer Price Index End of Year Supplemental Files and Revised Seasonal Adjustment Factors to be Available on February 12, 2025

Each year with the release of CPI data for January, relative importance weights are updated and seasonal adjustment factors are recalculated to reflect price movements from the just-completed calendar year. This routine annual recalculation may result in revisions to seasonally adjusted indexes for the previous 5 years.

Revised seasonal adjustment factors and additional end of year files will be released on February 12, 2025, at 8:30 AM eastern time, in conjunction with the release of CPI data for January 2025. The following files will be available on the CPI supplemental files page, www.bls.gov/web/cpi.suppl.toc.htm:

- * Consumer Price Index Seasonal Adjustment Factors (XLSX)
- * Consumer Price Index Relative Importance (XLSX)
- * Consumer Price Index Revised Seasonally Adjusted Indexes and Factors (XLSX)
- * CPI-U Median Price Change and Median Price Change Standard Errors (XLSX)

- * CPI-U Response Rates (XLSX)
- * Consumer Price Index Components for Seasonal Aggregation to All items (XLSX)
- * Consumer Price Index Series Subject to Intervention Analysis Seasonal Adjustment (XLSX)
- * CPI-U Historical Cost Weights (XLSX)
- * CPI-W Historical Cost Weights (XLSX)

With the release of these files, the seasonal factors and selected end of year materials will be available in the API and FTP files. These files will be available for all U.S. city average CPI-U data and a subset of U.S. city average CPI-W data.

In preparation for the upcoming end of year supplemental files and revised seasonal adjustment factors, last year's end of year supplemental files and revised seasonal adjustment factors are now available on the CPI supplemental files page.

BLS posted last year's seasonal factors and other end of year materials in the API and FTP files on November 22, 2024.

For additional information, contact the CPI Information and Analysis section at cpi_info@bls.gov or (202) 691-7000.

Consumer Price Index Publication Changes to be Implemented on February 12, 2025

With the publication of January 2025 data in February 2025, several indexes and average price series will be discontinued, and one index title will change.

The following CPI indexes will continue to be published at the national level, but will be discontinued for all metropolitan areas, census divisions, and regional size classes:

- * Electricity
- * Utility (piped) gas (often referred to as natural gas)
- * Energy services
- * Fuels and utilities
- * Household energy

The following CPI average price series will continue to be published at the national level, but will be discontinued for all metropolitan areas, census divisions, and regional size classes:

- * Electricity per KWH
- * Utility (piped) gas per therm

The following CPI index will have a title change:

- * Pet food will be changed to pet food and treats

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) measures the change in prices paid by consumers for goods and services. The CPI reflects spending patterns for each of two population groups: all urban consumers and urban wage earners and clerical workers. The all urban consumer group represents over 90 percent of the total U.S. population. It is based on the expenditures of almost all residents of urban or metropolitan areas, including professionals, the self-employed, the poor, the unemployed, and retired people, as well as urban wage earners and clerical workers. Not included in the CPI are the spending patterns of people living in rural nonmetropolitan areas, farming families, people in the Armed Forces, and those in institutions, such as prisons and mental hospitals. Consumer inflation for all urban consumers is measured by two indexes, namely, the Consumer Price Index for All Urban Consumers (CPI-U) and the Chained Consumer Price Index for All Urban Consumers (C-CPI-U). The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) is based on the expenditures of households included in the CPI-U definition that meet two requirements: more than one-half of the household's income must come from clerical or wage occupations, and at least one of the household's earners must have been employed for at least 37 weeks during the previous 12 months. The CPI-W population represents approximately 30 percent of the total U.S. population and is a subset of the CPI-U population.

The CPIs are based on prices of food, clothing, shelter, fuels, transportation, doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected each month in 75 urban areas across the country from about 6,000 housing units and approximately 22,000 retail establishments (department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments). All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 75 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visit, telephone call, web, or app collection by the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are aggregated using weights, which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W, separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 23 selected local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For the C-CPI-U, data are issued only at the national level. The CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and subject to three subsequent quarterly revisions.

The index measures price change from a designed reference date. For most of the CPI-U and the CPI-W, the reference base is 1982-84 equals 100. The reference base for the C-CPI-U is December 1999 equals

100. An increase of 7 percent from the reference base, for example, is shown as 107.000. Alternatively, that relationship can also be expressed as the price of a base period market basket of goods and services rising from \$100 to \$107.

Sampling Error in the CPI

The CPI is a statistical estimate that is subject to sampling error because it is based upon a sample of retail prices and not the complete universe of all prices. BLS calculates and publishes estimates of the 1-month, 2-month, 6-month, and 12-month percent change standard errors annually for the CPI-U. These standard error estimates can be used to construct confidence intervals for hypothesis testing. For example, the estimated standard error of the 1-month percent change is 0.03 percent for the U.S. all items CPI. This means that if we repeatedly sample from the universe of all retail prices using the same methodology, and estimate a percentage change for each sample, then 95 percent of these estimates will be within 0.06 percent of the 1-month percentage change based on all retail prices. For example, for a 1-month change of 0.2 percent in the all items CPI-U, we are 95 percent confident that the actual percent change based on all retail prices would fall between 0.14 and 0.26 percent. For the latest data, including information on how to use the estimates of standard error, see www.bls.gov/cpi/tables/variance-estimates/home.htm.

Calculating Index Changes

Movements of the indexes from 1 month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The following table shows an example of using index values to calculate percent changes:

	Item A	Item B	Item C
Year I	112.500	225.000	110.000
Year II	121.500	243.000	128.000
Change in index points	9.000	18.000	18.000
Percent change	$9.0/112.500 \times 100 = 8.0$	$18.0/225.000 \times 100 = 8.0$	$18.0/110.000 \times 100 = 16.4$

Use of Seasonally Adjusted and Unadjusted Data

The Consumer Price Index (CPI) program produces both unadjusted and seasonally adjusted data. Seasonally adjusted data are computed using seasonal factors derived by the X-13ARIMA-SEATS seasonal adjustment method. These factors are updated each February, and the new factors are used to revise the previous 5 years of seasonally adjusted data. The factors are available at www.bls.gov/cpi/tables/seasonal-adjustment/seasonal-factors-2024.xlsx. For more information on data revision scheduling, please see the Factsheet on Seasonal Adjustment at www.bls.gov/cpi/seasonal-adjustment/questions-and-answers.htm and the Timeline of Seasonal Adjustment Methodological Changes at www.bls.gov/cpi/seasonal-adjustment/timeline-seasonal-adjustment-methodology-changes.htm.

How to Use Seasonally Adjusted and Unadjusted Data

For analyzing short-term price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from weather events, production cycles, model changeovers, holidays, and sales. This allows data users to focus on changes that are not typical for the time of year.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data are also used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index before adjustment for seasonal variation. BLS advises against the use of seasonally adjusted data in escalation agreements because seasonally adjusted series are revised annually for five years.

Intervention Analysis

The Bureau of Labor Statistics uses intervention analysis seasonal adjustment (IASA) for some CPI series. Sometimes extreme values or sharp movements can distort the underlying seasonal pattern of price change. Intervention analysis seasonal adjustment is a process by which the distortions caused by such unusual events are estimated and removed from the data prior to calculation of seasonal factors. The resulting seasonal factors, which more accurately represent the seasonal pattern, are then applied to the unadjusted data.

For example, this procedure was used for the motor fuel series to offset the effects of the 2009 return to normal pricing after the worldwide economic downturn in 2008. Retaining this outlier data during seasonal factor calculation would distort the computation of the seasonal portion of the time series data for motor fuel, so it was estimated and removed from the data prior to seasonal adjustment. Following that, seasonal factors were calculated based on this "prior adjusted" data. These seasonal factors represent a clearer picture of the seasonal pattern in the data. The last step is for motor fuel seasonal factors to be applied to the unadjusted data.

For the seasonal factors introduced for January 2024, BLS adjusted 46 series using intervention analysis seasonal adjustment, including selected food and beverage items, motor fuels and vehicles.

Revision of Seasonally Adjusted Indexes

Seasonally adjusted data, including the U.S. city average all items index levels, are subject to revision for up to 5 years after their original release. Every year, economists in the CPI calculate new seasonal factors for seasonally adjusted series and apply them to the last 5 years of data. Seasonally adjusted indexes beyond the last 5 years of data are considered to be final and not subject to revision. For January 2024, revised seasonal factors and seasonally adjusted indexes for 2019 to 2023 were calculated and published. For series which are directly adjusted using the Census X-13ARIMA-SEATS seasonal adjustment software, the seasonal factors for 2023 will be applied to data for 2024 to produce the seasonally adjusted 2024 indexes. Series which are indirectly seasonally adjusted by summing seasonally adjusted component series have seasonal factors which are derived and are therefore not available in advance.

Determining Seasonal Status

Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. Using these criteria, BLS economists determine whether a series should change its status from "not seasonally adjusted" to "seasonally adjusted", or vice versa. If any of the 81 components of the U.S. city average all items index change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes before that period will not be changed. For 2024, 36 of the 81 components of the U.S. city average all items index are not seasonally adjusted.

Contact Information

For additional information about the CPI visit www.bls.gov/cpi or contact the CPI Information and Analysis Section at 202-691-7000 or cpi_info@bls.gov.

For additional information on seasonal adjustment in the CPI visit www.bls.gov/cpi/seasonal-adjustment/home.htm
