## SESSIONS ( 164 )

9:30 AM - 10:15 AM

### Aggregate Plant Processing 101

West Hall 212

In this session, we'll dive into the world of aggregate processing plants, exploring best practices for boosting efficiency and maximizing production. Using real-world quarry simulations and case stud...

9:30 AM - 10:15 AM

## Blended Cements for Use in Concrete

West Hall 213

Cement specifications in North America have evolved significantly over the past century to meet new demands and accommodate sustainable practices. ASTM C595, Standard Specification for Blended Hydraul...

9:30 AM - 10:15 AM

## Controlling Traffic Inside the Work Zone

West Hall 203

In the U.S., there are no specific federal standards to manage heavy equipment traffic and prevent runover or backover incidents inside work zones. ARTBA has partnered with OSHA, FHWA, and leading roa...

9:30 AM - 10:15 AM

## Eyes on Safety: Enhancing Mobile Equipment with Camera Technology

West Hall 214

Have you ever asked yourself what the benefits are of adding cameras to your fleet? Hear real-life examples and case studies of camera footage saving personnel and member companies from devastating le...

9:30 AM - 10:15 AM

## Fuel Management Systems for Off-Road Vehicles

West Hall 206

This session explores fuel management from an operations perspective and how to integrate a system into daily workflows to secure fuel as an asset, track usage, and connect this data to back-office ac...

9:30 AM - 10:15 AM

### **How to Build a People-First Company**

West Hall 232

Everyone says “people are your greatest asset”—but most companies still bleed out talent, trust, and time. This session gives you the blueprint to fix that. Construction CEO Nic Parish shares real ...

9:30 AM - 10:15 AM

### **Leading Ladies: Practical Strategies to Overcome Challenges and Manage It All**

West Hall 219

In recent years, the industry has made significant progress in recognizing and celebrating women, acknowledging their unique perspectives and valuable contributions in a historically male-dominated sp...

9:30 AM - 10:15 AM

### **Smart Tech in Site Prep: Accelerate Timelines and Drive Profitability**

West Hall 225

This session highlights site preparation projects that use tractors and side dump trailers instead of traditional scrapers and haul trucks. Our case study demonstrates how this approach reduces operat...

9:30 AM - 10:15 AM

### **Tailored Risk Solutions for Top Contractors**

West Hall 201

In the ever-evolving construction industry, well-performing contractors face unique challenges and opportunities when it comes to managing risk. This session will explore the spectrum of risk and loss...

9:30 AM - 10:15 AM

### **Understanding the Financial Concepts Behind How to Charge for Owned Equipment**

West Hall 218

Many contractors struggle with how to charge projects for owned equipment. This session introduces the financial concepts used to convert equipment ownership cash flows—occurring at different times du...

10:45 AM - 11:45 AM

### **Avoiding and Managing Problem Projects**

West Hall 206

Contractor profit performance often suffers because of "loser projects." This session focuses on practical strategies to avoid, identify, and manage these projects to protect your bottom line. Topi...

10:45 AM - 11:45 AM

### **Boosting Compaction Performance: Techniques, Technology & a 1% Advantage**

West Hall 218

Success on the paving job does not stop at placement. It is achieved with the rollers. In this session, you will learn about the key factors that influence in-place density and smoothness, including s...

10:45 AM - 11:45 AM

### **Crew Collaborative: Empowering a New Generation**

West Hall 225

This session provides simple, actionable tools to help attendees recruit talent in their communities and online. Building a long-term workforce starts from within the industry, and this discussion foc...

10:45 AM - 11:45 AM

### **Evaluating Concrete for Constructability**

West Hall 213

It is important to understand changes in cementitious materials and concrete mix designs the market is demanding to produce concrete mixes with reduced carbon footprint. These changes can impact const...

10:45 AM - 11:45 AM

### **Heavy Equipment Performance KPI's Every Executive Should Know**

West Hall 210

Fleet management can be a challenging business area to manage and improve. Balancing the size and composition of your fleet with effective maintenance practices, maximizing equipment utilization and o...

10:45 AM - 11:45 AM

### **How to Use Drones in Your Earthmoving Business - Practical Applications**

West Hall 219

Quantum Land Design has been helping civil contractors integrate drones into their workflows since 2016. This session is designed for contractors who are considering or already using drones in their b...

10:45 AM - 11:45 AM

### **Leadership Lessons for Modern Construction Leaders**

West Hall 232

David Woods, former CEO of Ditch Witch and author of two leadership books—including his newest, Old-Fashioned Leadership: Lessons from the Patio—now spends his days helping leaders grow, succeed, and ...

10:45 AM - 11:45 AM

### **Pulse Check on the Equipment Market**

West Hall 203

Get an exclusive update on current market trends across retail, wholesale, and auction channels. This session explores the state of used equipment values at both category and subcategory levels for th...

10:45 AM - 11:45 AM

### **Risk Tolerance is Shaping Your Safety Culture**

West Hall 201

Ever heard “we’ve always done it this way, and nothing bad has ever happened”? As human beings we are hard wired to learn through experience and often those experiences are risky. Much like learning h...

10:45 AM - 11:45 AM

### **Safe Mobile Crane Operations in the Vicinity of Power Lines**

West Hall 214

Operating mobile cranes near energized power lines presents a significant hazard that requires careful planning and risk assessment and mitigation. This session offers an in-depth overview of the key ...

10:45 AM - 11:45 AM

### **Smarter Quarries: AI Solutions Powering the Future of Aggregates**

West Hall 212

Artificial intelligence is no longer a futuristic concept—it's already transforming operations across the aggregates industry. This panel brings together experts implementing a wide range of AI soluti...

11:00 AM - 11:45 AM

### **Never Idle: Tech Made Easy and Grounded in Purpose**

West Hall 108

The construction industry has been going through a shift. The John Deere keynote centers on the transformative role of technology in addressing persistent challenges in the construction industry, emph...

1:00 PM - 1:45 PM

### **End-to-End Connectivity for Construction: On Highway, Off Highway, One Solution, One Platform**

West Hall 108

As the impact of AI and advanced insights grows, so does the demand for a single connectivity platform that spans across business functions (On/Off-highway). Geotab examines the challenges and opportu...

1:00 PM - 2:00 PM

### **Breaking Barriers: Uniting the Construction Industry for Mental Wellbeing**

West Hall 214

The construction industry faces one of the highest rates of suicide among all professions, making mental health a critical priority. The Construction Industry Alliance for Suicide Prevention (CIASP), ...

1:00 PM - 2:00 PM

### **Building an AI-Ready Team in Equipment Management and Maintenance**

West Hall 203

Experience the transformative potential of AI in construction management through highly interactive exercises built around real field scenarios and common industry challenges. Participants will explor...

1:00 PM - 2:00 PM

### **Building Better Teams: Effective Coaching and Career Conversations in Construction**

West Hall 232

Join us for an engaging session focused on the art of coaching and career conversations in the construction industry. In this interactive workshop, we'll shift the focus from traditional annual review...

1:00 PM - 2:00 PM

### **Building Longitudinal Joints to Last!**

West Hall 225

This session covers proven approaches for constructing durable longitudinal joints. We focus on proper paver setup and paving practices, followed by effective compaction techniques to meet or exceed d...

1:00 PM - 2:00 PM

### **Building Tomorrow: How Digital Advancements are Shaping the Construction Industry**

West Hall 212

Today's machine operators expect equipment to function not only as a tool carrier but also as a software carrier. Manufacturers are meeting this demand with emerging digital technologies that enhance ...

1:00 PM - 2:00 PM

### **Drilling & Blasting Fundamentals**

West Hall 218

This course is designed for individuals who know little to NOTHING about drilling and blasting. The course will walk you through the very BASIC principles of drilling and blasting and is intended to h...

1:00 PM - 2:00 PM

### **Evaluation of Cementitious Materials for Concrete Performance**

West Hall 213

The concrete industry has established targets to achieve a reduction in manufacturing emissions. Cements are changing to a lower carbon footprint. As the supply of traditional supplementary cementitio...

1:00 PM - 2:00 PM

### **Fundamentals of Construction Selling - Set Yourself Apart from Your Competition**

West Hall 219

In This session provides practical steps to successfully sell construction projects and improve your hit rate, margins, and recurring business. Attendees will learn how to disrupt the status quo in...

1:00 PM - 2:00 PM

### **Ground Bearing Pressure and Your Work Ticket, What Do They Have in Common?**

West Hall 201

Understanding ground bearing pressure isn't just for engineers—it's critical knowledge for anyone working on a construction site. This session explores the surprising but essential link between site g...

1:00 PM - 2:00 PM

### **Navigating Seamless Generational Leadership and Succession Planning in the Construction Industry**

West Hall 206

Succession planning is critical for long-term business success. This session explores practical steps to prepare your organization for leadership transitions while ensuring stability and growth. Ke...

2:00 PM - 2:45 PM

### **Designing Autonomy Around People: The Future of Remote Mining and Quarry Operations**

West Hall 108

As automation and remote operations redefine mining and quarrying, one principle remains constant: technology should empower people, not sideline them. This session explores how Luck Stone and Epiroc ...

2:00 PM - 2:45 PM

### **In The Mix Presents: The Contractor Cheat Code for Brand Building**

—

How Construction Industry leaders have built strong brands that drive viewers, followers and ultimately, Clients. In The Mix with Marvin Joles presents a Live Podcast with a panel made up of industry ...

2:30 PM - 3:15 PM

### **A Collaborative Approach to WIP Meetings**

West Hall 218

The WIP meeting is a unique opportunity for finance and operations teams to collaborate, resulting in better oversight that can improve project outcomes. Taking a collaborative approach to project rev...

2:30 PM - 3:15 PM

### **A Tale of Two Projects: How Gaylor Electric is Leveraging Business Intelligence to Eliminate Fade**

West Hall 210

In many construction organizations, decisions are often driven by the HiPPO—the Highest Paid Person’s Opinion. At Gaylor, we’ve developed tools to empower data-driven decision-making and eliminate emo...

2:30 PM - 3:15 PM

### **An Updated Economic Outlook for the Aggregates Industry**

West Hall 201

Join us for this timely session on the economic state of the construction and aggregates industries, offering an updated outlook as of early 2026. This presentation will examine the latest impacts of ...

2:30 PM - 3:15 PM

### **Beyond Recruitment: Retaining Talent to Build a Resilient Construction Workforce**

West Hall 232

The construction industry faces a persistent workforce shortage, and while recruitment is critical, retention is the real challenge. Without addressing why workers leave, the industry risks losing bot...

2:30 PM - 3:15 PM

### **Bio-Based Additives and Balanced Mix Design: Advancing Sustainability and Performance**

West Hall 213

Increased service demands from asphalt pavements due to ever-increasing volumes, coupled with aging highway networks, and calls for improved sustainability across the industry have rendered the need f...

2:30 PM - 3:15 PM

### **Embracing Mixed Fleet: OEMs and Tech Providers Coming Together**

West Hall 225

A truth of the construction industry is that no one equipment manufacturer or technology provider can serve every customer's needs. It will take both sides to evolve the industry to enable mixed fleet...

2:30 PM - 3:15 PM

### **Engineering Resilience: Concrete Innovations That Reduce Operational Expenses**

West Hall 206

This presentation provides insight into the numerous benefits of building 2 to 7-story commercial projects with concrete. Combining the strength and durability of reinforced concrete with high perfor...

2:30 PM - 3:15 PM

### **From Debris to Dollars: Crushing Startup Secrets Every Contractor Should Know**

West Hall 219

Thinking about getting into mobile crushing but not sure where to start? Join this contractor-led panel as we break down the essentials of launching your crushing operation the right way. Learn how to...

2:30 PM - 3:15 PM

### **In the Trenches, An Operators Perspective on Trench Safety**

West Hall 203

This session brings together safety experts, survivors, and industry leaders for a powerful and practical discussion on the critical importance of trench safety. Attendees will gain insights into: ...

2:30 PM - 3:15 PM

### **Preparing for Roadside Enforcement of Mobile Crane and Other Special Equipment**

West Hall 212

As enforcement practices continue to evolve, operators of mobile cranes and other specialized equipment face growing complexity on the nation's roadways. This session offers a comprehensive look at cu...

2:30 PM - 3:15 PM

### **Zero Incident Sites - Technology will Increase Safety**

West Hall 214

On-site safety remains one of construction's biggest challenges, often impacted by real-time scheduling pressures and the urgency to "get the job done." Even with strict processes in place, accidents ...

3:00 PM - 3:45 PM

### **Leading in the Age of AI**

West Hall 108

Ready or not, AI is here. And it's redefining how we lead, innovate, and grow. Join Martin Willoughby, CEO of Command Alkon, as he takes the stage to explore what it truly means to lead in the Age ...

9:30 AM - 10:15 AM

### **A Roadmap to Reducing Utility Dig-Ins**

West Hall 210

Preventing damages to underground utilities in construction has a demonstrated ROI with less downtime, lower claims, and increased safety record. This panel presentation will provide the framework fo...

9:30 AM - 10:15 AM

### **Building Resilient Teams: Prioritizing Behavioral Health in the Dirt World**

West Hall 212

Overview: The construction industry operates in a high-pressure environment that demands resilience and adaptability. This panel discussion will shift the focus from viewing mental health as a chal...

9:30 AM - 10:15 AM

### **Conveyors 101**

West Hall 218

This session provides a concise introduction to conveyor fundamentals, covering essential theory and best practices for maintenance. Learn the core principles that ensure your conveyors operate effi...

9:30 AM - 10:15 AM

### **Decarbonization and Carbon Reporting Playbook: Practical Approaches For Construction Professionals**

West Hall 213

Construction companies are entering a new era of carbon accountability, driven by evolving regulations (including California and Europe), owner requirements, and global clients that increasingly expect...

9:30 AM - 10:15 AM

### **Dumping the Dump Bed: ADTs That Do More**

West Hall 201

Each year, more than 4,000 new articulating dump trucks (ADTs) are sold globally, yet most are primarily used for basic dumping tasks. By rethinking the potential of these machines, contractors can ma...

9:30 AM - 10:15 AM

### **Getting A Smooth Take Off Every Time!**

West Hall 219

A common challenge for paving crews is to get a smooth take off at the start of paving. The purpose of this session is to review the steps every paving crew should follow each time they get ready to ...

9:30 AM - 10:15 AM

## Lean Principles: It's About People, Process, & Change

West Hall 225

Toyota, Caterpillar and John Deere are known for utilizing lean tools and systems to minimize waste and maximize productivity, but could smaller non-manufacturing companies also benefit from Lean Prin...

9:30 AM - 10:15 AM

## Mass Concrete - How Hot Can It Get?

West Hall 206

Mass concrete placements present several challenges for construction from mixture development, scheduling placements, controlling temperature, and protection after completion. Specifications impose tw...

9:30 AM - 10:15 AM

## Primed for Growth. You Can't Scale Chaos - the Foundation You Need to Break through that Next Ceiling

West Hall 203

Most contractors hit a ceiling because their business runs in constant reaction mode—chasing problems, putting out fires, and making decisions on the fly. This session breaks down the foundational sys...

9:30 AM - 10:15 AM

## Reducing Common CMV Over-the-Road Accidents Through Training

West Hall 214

Commercial Motor Vehicle (CMV) accidents are often preventable—and training is one of the most effective tools we have to reduce them. This session focuses on identifying the most common causes of CMV...

9:30 AM - 10:15 AM

### **Stop, Collaborate and Listen: How to Navigate Conflict With Confidence**

West Hall 232

Conflict is inevitable in all areas of our lives - at work it can impact individual production and decision-making, team performance, and the safety of our operations. While we can't eliminate conflic...

10:00 AM - 10:45 AM

### **Autodesk**

West Hall 108

10:45 AM - 11:45 AM

### **Building a Construction Brand Online: Tips From Top Content Creators**

West Hall 232

Social media has become a powerful business tool in construction—but only when it's used with purpose. In this panel discussion, five of the industry's most trusted and recognizable content creators s...

10:45 AM - 11:45 AM

## Crushing 101

West Hall 218

Crushing is a fundamental process in many operations, but selecting the right equipment and optimizing its performance can make all the difference. This session offers a comprehensive introduction to ...

10:45 AM - 11:45 AM

## Do You Know What You're Doing? Telehandler and Forklift Compliance

West Hall 212

Despite the widespread use of forklifts and telehandlers in both general industry and construction, there is still a significant gap in understanding the safety and compliance standards that govern ...

10:45 AM - 11:45 AM

## Effective Communications: Removing Barriers to Respect, Connection and Psychological Safety

West Hall 203

Have you ever thought, why do we struggle to communicate when we have done it our whole lives? Workplaces have changed and our teams are increasingly diverse. That coupled with the fact that mos...

10:45 AM - 11:45 AM

## Foundational Success: 10 Strategies for Employee Retention in the Construction Industry

West Hall 225

Employee retention is one of the biggest challenges in the construction industry—but it doesn't have to be. Join us for a practical, solutions-focused session that goes beyond theory to deliver action...

10:45 AM - 11:45 AM

### **Ownership Transfer and Management Succession Planning for the Construction Industry**

West Hall 213

Planning for management succession and ownership transfer is one of the most critical—and often overlooked—challenges in construction. This session provides a comprehensive overview of the issues, ini...

10:45 AM - 11:45 AM

### **Smarter Paving: Real-World Lessons in Intelligent Compaction and Emerging Technologies**

West Hall 219

Unlock the full potential of asphalt paving by learning from experts on the leading edge of compaction and paving technology. This panel brings together three industry innovators to share insights int...

10:45 AM - 11:45 AM

### **The Evolution of Sustainability Initiatives & EPDs in North America**

West Hall 214

Experts report that the building industry "accounts for 36% of worldwide energy usage and 40% of CO2 emissions." A growing number of local, state, and federal procurement policies require environmenta...

10:45 AM - 11:45 AM

### **The Value of a High Performing Equipment Manager**

West Hall 201

In today's highly competitive market, bids are often won or lost by just a few points. What factors can give your organization the edge while ensuring long-term profitability? This session explores wh...

10:45 AM - 11:45 AM

### **Troubleshooting Concrete Surface Defects: Causes, Prevention, and Cure**

West Hall 206

In this session, participants will learn about real-life problems caused by inadequacies in design, construction, and maintenance practices. Based on various problems, participants will learn how to c...

10:45 AM - 11:45 AM

### **Turning Your Excavator Into the Ultimate Multipurpose Machine**

West Hall 210

In this session, we will discuss how the marriage of heavy iron, precision GPS technology, and tilt-rotation solutions has turned the bucket and stick of an excavator into a generator of masterpiece la...

11:00 AM - 11:45 AM

### **The Next Era of Earthmoving: How Robotic Intelligence is Transforming Construction Productivity**

West Hall 108

Construction is on the brink of its next major productivity leap. In this session, Gravis Robotics CEO Ryan Luke Johns explores how augmentation and autonomy are reshaping earthmoving—from safety and ...

1:00 PM - 1:45 PM

### **Solving Customers' Toughest Challenges through Advanced Digital & Technology Solutions**

West Hall 108

1:00 PM - 2:00 PM

### **Buy the Use, Not the Iron: Equipment as a Service**

West Hall 210

In this session, we'll dive into the innovative concept of Equipment as a Service (EaaS) and explore how it could reshape mobile fleet management in any industry. EaaS is a new procurement method that...

1:00 PM - 2:00 PM

### **Conveyor Walkdowns - Identifying Issues and Implementing Solutions**

West Hall 225

In this session, we'll begin at the tail and progress to the head pulley, examining potential issues that could impact your conveyors' performance, potentially leading to downtime, increased maintenanc...

1:00 PM - 2:00 PM

## Crane Inspection: What You Need to Know About Updates to B 30.5

West Hall 218

Crane inspections aren't just a regulatory requirement—they're critical for maintaining safe operations and protecting the lives of those working in and around cranes. As crane technology evolves, s...

1:00 PM - 2:00 PM

## Expect the Unexpected: Navigating Macroeconomic Trends in Construction

West Hall 206

Join Christian Lawrence, Head of Cross-Asset Strategy at RaboResearch and Greg Stangl, Head of Regional Sales, North America for DLL's Construction business, as they delve into the unpredictable lands...

1:00 PM - 2:00 PM

## From Buzzword to Blueprint: Transforming Company Culture

West Hall 232

This session showcases the revolutionary Repurposed Educator framework, developed by a dynamic team of former educators who are reshaping company cultures across the U.S. Discover how this framework, ...

1:00 PM - 2:00 PM

## Moving Mountains: Technology Behind South Carolina's EV Plant Earthworks

West Hall 214

Upon project completion, nearly 24 million cubic yards of earth will be relocated to make way for a new electric vehicle plant in South Carolina. This session will feature the technology being used to...

1:00 PM - 2:00 PM

### **Tack Coat Problems and Solutions**

West Hall 219

Proper tack coat application is critical for pavement performance and longevity. This session provides an overview of the purpose of tack coats, recommended application rates, and the different produc...

1:00 PM - 2:00 PM

### **The Missing Link: Charging Infrastructure and BEV Adoption at the Edge of the Grid**

West Hall 203

Battery electric and hybrid vehicles are on the rise, but are your jobsites ready? Join Preston Moore, Manager, Power Solutions – Electric Powertrain & Charging Systems at John Deere for a forward-loo...

1:00 PM - 2:00 PM

### **Understand Them To Attract Them - The Next Gen Workforce**

West Hall 212

Many agree there's a lack of understanding about the next-gen workforce of our industry, but few offer practical steps to change that. Thomas Haun will focus on actionable information from US trends t...

1:00 PM - 2:00 PM

### **Utilizing Warm Mix Asphalt (WMA) Technology to Reduce Blue Smoke Emissions at Asphalt Plants and Paving Sites**

West Hall 213

As air quality regulations tighten and communities raise concerns about nuisance emissions, contractors need practical solutions to stay compliant and maintain positive relationships. This session wil...

2:00 PM - 2:45 PM

### **Beyond the Truck: Differentiating with Services & Solutions**

West Hall 108

In today's competitive landscape, the true value of a truck extends far beyond its hardware. Join us for a deep dive into how innovative services and integrated solutions are redefining the trucking i...

2:00 PM - 3:00 PM

### **LIVE PODCAST RECORDING!**

—

Catch a special live recording of the CONEXPO-CON/AGG Podcast right from the floor of North America's largest construction trade show. Host Taylor White sits down with Mike Simon—aka Dirt Perfect—for ...

2:30 PM - 3:15 PM

### **Asphalt Meets the Information Highway: Leveraging Social Media for Growth and Impact**

West Hall 225

Social media is transforming how companies in the asphalt industry connect with their audiences, from boosting brand awareness to showcasing sustainability efforts. This session, featuring a panel of ...

2:30 PM - 3:15 PM

### **Developing Soft Skills in Sales**

West Hall 219

2:30 PM - 3:15 PM

### **Eyes in the Sky, On-Demand: Drone Docks Built for Dirt, Deadlines, and Data**

West Hall 218

Discover how autonomous drone docks are transforming jobsite operations with real-time aerial intelligence, 24/7 monitoring, and zero pilot overhead. This session will break down how drone docks strea...

2:30 PM - 3:15 PM

### **Leading in a New Era**

West Hall 232

The construction industry stands at the crossroads of tradition and transformation. In Leading in a New Era, Sydne Jacques and Kristina McMillan will explore how to bridge the gap between a time-teste...

2:30 PM - 3:15 PM

## Quarry Kaizen: How Little Changes Can Add Up to Big Improvements

West Hall 214

Quarry, aggregate and large civil projects all face a similar problem: repeated work, day in and day out. But in that repetitiveness comes the opportunity to make big impacts to your bottom line from ...

2:30 PM - 3:15 PM

## Reducing Work Injury Claims and Recovery Time With Near-Site Care & First Aid Programs

West Hall 210

Learn how implementing a comprehensive workforce safety solution including near-site medical support, and effective first aid programs helped reduce our EMR is one year. Attendees will gain actionable...

2:30 PM - 3:15 PM

## Roller-Compacted Concrete for Use in Pavements and Dam Construction

West Hall 213

Roller-compacted concrete (RCC) is a "zero slump" concrete that has been used extensively in pavement and dam construction throughout the United States for over 45 years. Whether spread with bulldozer...

2:30 PM - 3:15 PM

## Smooth Operations: Essential Plant Operations for Quality Mix Production

West Hall 203

Consistent, high-quality asphalt mix starts at the plant. This session will cover the essential elements of plant operations that directly impact mix performance and project success. Attendees will ga...

2:30 PM - 3:15 PM

### **Specifications - Getting the Right Tool**

West Hall 212

Many companies, especially startups and small businesses, struggle with specifying and selecting the right equipment for their needs. This session provides an overview of equipment specification and p...

2:30 PM - 3:15 PM

### **State of the Construction Equipment Economy**

West Hall 206

Gain a greater understanding of how macro trends in the construction industry impact equipment buying and selling decisions. Experts from Equipment World and EquipmentWatch will take a deep dive in...

2:30 PM - 3:15 PM

### **What's the Difference?! Certification vs Certificate vs Qualification vs Competence**

West Hall 201

Do you know the difference between a certificate, certification, qualification, and competence? These distinctions matter—and could determine whether your organization meets OSHA and ASME compliance...

3:00 PM - 3:45 PM

### **From Iron to Impact: How VR Simulation Is Transforming Heavy Equipment Training**

West Hall 108

Construction and agricultural equipment manufacturers face mounting pressure to train operators and technicians faster, safer, and more consistently—while dealing with rising equipment costs, shrinkin...

9:30 AM - 10:15 AM

### **A Cold Night in February that Changed Everything**

West Hall 201

This presentation shares the story of two 19-year-old workers who were placed in an environment that was both unsafe and inadequately prepared. The discussion will focus on key safety issues, includin...

9:30 AM - 10:15 AM

### **AI and Construction Safety, Real Examples, Real Results**

West Hall 213

We hear about AI everywhere these days, but what's actually useful for construction? Can it help solve one of our industry's most stubborn problems... safety? In this interactive presentation you'll h...

9:30 AM - 10:15 AM

## Boosting Efficiency and Sustainability in Asphalt Plant Operations

West Hall 203

Explore how advanced technologies are driving both operational efficiency and environmental responsibility in asphalt plant operations. This session focuses on practical solutions that not only help a...

9:30 AM - 10:15 AM

## CFO Best Practices

West Hall 214

CFOs play a key role on the executive management team and should be responsible for more than just "running the numbers". What best practices can CEOs put in place to drive a higher ROI from Construc...

9:30 AM - 10:15 AM

## Connected Machines: Precision GPS solutions for every machine on the jobsite

West Hall 225

This session on connected machines focuses on the latest state of precision GPS offerings in the earthmoving construction segment. While long offered, today's construction contractor has more choices ...

9:30 AM - 10:15 AM

## How Oil Analysis and Fluid Filtering Combine to Extend Component Life.

West Hall 210

Many equipment-intensive companies rely on oil analysis as a key maintenance practice. However, when oil analysis is combined with bulk oil filtration or the purchase of certified clean oil, component...

9:30 AM - 10:15 AM

### **Key Design and Construction Elements for a Successful Concrete Paving Project**

West Hall 206

This program will focus on best practices for designing, planning, and building concrete pavements for parking lots, industrial or trucking facilities, and local streets. Key practices like proper thi...

9:30 AM - 10:15 AM

### **Nobody Wants to Suck! How to Build Your Employee's Blueprint for Success!**

West Hall 232

Tired of hearing "no one wants to work anymore"? This session delivers a practical, real-world approach to fixing the root causes of employee disengagement and turnover in the trades. You'll hear how ...

9:30 AM - 10:15 AM

### **Optimizing Crusher Efficiency: Best Practices for Operational Excellence**

West Hall 218

This session offers a comprehensive look at optimizing crusher efficiency across jaw crushers, horizontal shaft impactors, and cone crushers. We'll dive into the key operational practices that enhance...

9:30 AM - 10:15 AM

## Relational Leadership

West Hall 219
