RE: Fort Bend County Sienna Branch Library
Freestanding Interactive Art Installation

Dear Ms. Russell:

As a result of progressive and collective meeting with the County library and facilities management representatives, a suitable and dynamic art form has been identified for the new library.

Objective:

To create a dynamic and interactive art installation that will stimulate curiosity and further investigation of the various geometric forms. Incorporating descriptions of the objects and relevant symbolic uses of the forms will enhance the interest to explore more. Mainly targeting children and teens, a total of 16 objects will be organized in vertical and horizontal sequences. Each object will be capable of rotation for individual study and for multiple configurations. The objects will be contained in a translucent acrylic frame with vertical axes holding the pieces together. The idea is to make the objects appear suspended in space. The total installation will organize horizontal simple pieces at the bottom with progressive stacking to more elaborate geometric forms and subjects.

Construction:

Due to the high level of exposure and anticipated use, the construction of the parts and its containment will require the use of high performance finishes and components. The geometrical pieces will be made out of acrylic and/or wood and will be painted from a diverse color selection of primary and mix colors. Description of the objects and relevant symbolic uses will be incorporated in one side of each individual piece for a total of sixteen. Specialized suppliers and manufacturerers will execute the artwork.

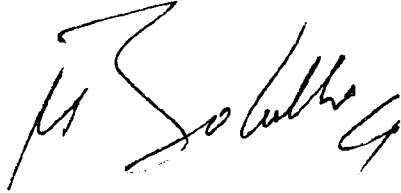

Deliverable Process:

In order to complete this project the following steps are suggested:

1. Method of delivery. By building the primary components in sections, four objects at the time, it will allow review participation by the original representatives prior to final installation.

2. The total budget for the artwork to be \$25,000.00 (twenty-five thousand dollars) and will be paid by C.C. Lee (STOA Architects).
3. This artwork is a donation to the library by C.C. Lee (STOA Architects).
4. Mario Bolullo to be the Artist/Designer and solely responsible for the progress, delivery, and final installation of the artwork.

Artist/Designer: Mario Bolullo

Subject: FBC Library - Artwork Installation

Clara:

Per Mario Bolullo's instructions I am sending you the proposed installation process for the donated Library artwork.

Installation Process:

The installation will consist of 16 geometrical pieces that will be preassembled off-site.

A frame system will also be installed and will consist of 4 parts: 1) One Base 2) Two Lateral Supports 3) One Top Cross Member.

All of these componets will be brought and assembled on site by the artist. A floor anchoring system will be provided to secure the art piece

but also recommended is to have at the base a set of wheels for the ease of relocation.

Please let me know if you need more information. Thank you for your time and assistance.

Sincerely,

Ramón M. Patiño
