Executive Summary

Today more and more Law Enforcement Agencies are looking for ways to improve the efficiency of the citation-writing process. Through the use of advanced mobile technologies, the capabilities in extending applications to mobile personnel are becoming more and more robust.

As Law Enforcement Agencies are beginning to extend applications to mobile devices, several aspects of this solution are critical:

- 1) Ability to extend multiple different applications to each singular device
 - a) Allowing data to be "sent" from each application to each designated device
 - b) Allowing data to be "collected" at the point of activity and reach back to those multiple data sources as well.
- 2) Ability for Law Enforcement Personnel to easily and quickly enter data (much of which can be done through auto-population such as Drivers License swiping and VIN Tag scanning) into the mobile device.
- 3) Ability for Law Enforcement Personnel to easily read, enter and manipulate data via a compact mobile device.
- 4) Ability to quickly dispose of (drop or throw) devices in case of emergency – without damaging and routinely replacing each hand-held device.
- 5) Ability for the data to interface with the Court system.

This document outlines how Law Enforcement Agencies can leverage Brazos Technology's Rapid Extension Framework (REF) and Symbol Hand-held Scanners to achieve these goals. This technology is designed to afford each Law Enforcement Agency the following benefits, including but not limited to:

- **Reallocation of Human Resources** – Citation data is electronically entered at the point of activity, so court personnel must no longer re-enter data from hand-written tickets and are available for other tasks.
- **Reduced paper flow** – Citations are printed singularly rather than in triplicate (or more), thereby reducing paper flow between Law Enforcement and the Administrative Office of the Courts.
- **Minimal data entry errors** – Minimize costly mistakes by enforcing business rules via technology, reduce amount of hand written data, and remove the need to manually transfer information from written citation to electronic database.

Brazos Technology Corporation e-Citation Solution Diagram

Law Enforcement personnel collects data by swiping Driver's License via the Mag Stripe Reader, Gain Vehicle Make, Model, and Year by scanning the Registration Tag, and easily choose offenses from drop down menus on the mobile device. Options are also available to gain key information (such as name) from credit cards, local student ID cards, etc. should an offender not have a license at time of traffic stop.

Officer with Motorola Wireless Unit

Handheld unit "speaks" directly to the printer via Bluetooth connection. The officer collects ticket (printed while officer is walking from offender's car) at the officer's vehicle. Citation printout includes all required instructions for the offender, offender's signature, and is designed to match the specific requirements of each PD.

Vehicle with Wireless Zebra Printer

Court and Law Enforcement Agency

Captured Citations are uploaded to the PD and Municipal Court Databases without the need for an intermediary server.

Officers simply place the handheld devices in their cradles at the end of the shift. All citations are uploaded while software upgrades and changes are download automatically.

Note: This is only a sample layout of communication between resources. This entire process is customizable depending upon your particular needs.

About Brazos Technology Corporation's Partner - Symbol Technologies, Inc.

Symbol Technologies, Inc., founded in 1975, is a global leader in secure mobile information systems that integrate application-specific handheld computers with wireless networks for data, voice and bar code data capture. Symbol products and services increase productivity and reduce costs for the world's leading retailers, logistics and transportation companies, government agencies, manufacturers and providers of healthcare, hospitality and homeland security.

Symbol's proven technology delivers efficiency. A unique combination of industry-leading innovation and award-winning ergonomic design, with miniaturization, superior power management and product ruggedization is the hallmark of Symbol's products.

Automated Citation Solutions - Symbol Technologies

Throughout the world, most law enforcement citations issued by officers, deputies, or officials for traffic or other minor violations are handwritten. After issuance, the citations (also called tickets, violation notices or infringement notices) are then manually entered into multiple databases using a key-based system. These manual systems are prone to many data entry errors or misinterpretation due to illegible writing.

Data entry error from these manual processes has far-reaching cost, efficiency and accuracy implications at each level of government:

- **Law Enforcement services, departments and authorities:** inaccurate records of violations
- **Court and justice services:** reduced ability to prosecute, convict or collect revenue efficiently
- **Motor vehicle departments:** inability to ensure that motorists with repeat violations remain off the road
- **Transportation departments:** inability to plan infrastructure improvements related to traffic signs, signals and congestion areas

Because of these inefficiencies and the resulting low productivity, the old manual key-based data entry processes have a negative effect on the organization's ability to serve the public.

A proven solution is available to eliminate these inefficiencies: **wireless handheld mobile computing systems.**

Software

Remote Data Capture (RDC) - Designed to run on any Windows CE or Pocket PC mobile device, RDC has been specifically designed for the unique constraints of a mobile device, to include small screen size, lack of true keyboard for entry, and the availability of barcode scanners and camera. RDC is completely flexible, allowing for the enforcement of business rules specific to your needs, to ensure speed and accuracy in performing mobile tasks and data collection. RDC supports any number of tasks, allowing a single device to serve in many capacities simultaneously. Brazos Technology refers to the combination of a mobile device and the RDC application as "an RDC".

Brazos Technology's RDC has also been specifically tailored to work in an e-Citation environment to meet the unique demands of each individual law enforcement agency – and with little effort be able to meet the constant demands brought on by:

- Changes in local and national laws,
- Changes in business processes,
- Changes and upgrades of back-end systems connecting to the mobile devices,
- And changes and upgrades of the mobile devices themselves.

Training

Brazos Technology provides training on two levels – (1) the administration and operation for overall management of the framework and configuration and (2) the mobile device user for the daily tasks, which will be performed using the e-Citation platform. One or more persons should be identified as the designated trainer(s). Brazos Technology will equip the designated internal trainers to perform training as needed.

Brazos Technology also offers a more comprehensive training program that entails having a Brazos representative on-site during the rollout of the application. During the rollout phase, the Brazos representative can 'ride-along' with the officers to provide on the job training – which has proven to be the most beneficial way to ensure officer is up to speed in the most efficient way possible.

SOFTWARE MAINTENANCE AGREEMENT

I. INCORPORATION OF DOCUMENTS

The following documents are attached hereto and, by this reference, incorporated in this Agreement:

Exhibit A	Covered Sites, Software & Configuration
Exhibit B	Authorized Licensee Contacts
Exhibit C	Services and Fees

II. COVERAGE

During the term of this Agreement, BRAZOS TECHNOLOGY agrees to provide maintenance and support services for the Covered Software operating at the site(s) and on the hardware configurations listed in Exhibit A ("Maintenance Services"). Unless specifically listed in Exhibit A, Section II, Covered Software does not include hardware vendor operating systems and other system software, Licensee-developed software, and third-party software (except any third party software embedded in the Covered Software).

III. DESCRIPTION OF MAINTENANCE SERVICES

A. Support Services. During the term of this Agreement, BRAZOS TECHNOLOGY will provide the services described herein so as to maintain the Covered Software in good working order, keeping it free from material defects so that the Covered Software shall function properly and in accordance with the accepted level of performance as set forth in the License Agreement.

(1) Service Response. BRAZOS TECHNOLOGY will make available to Licensee a telephone number (the "Support Center HOTLINE") for Licensee to call requesting service of the Covered Software. The Support Center HOTLINE operates 24 x 7 x 365. The HOTLINE can also be used to notify BRAZOS TECHNOLOGY of problems associated with the Covered Software and related documentation.

B. Remedial Support. Upon receipt by BRAZOS TECHNOLOGY of notice from Licensee through the Support Center HOTLINE of an error, defect, malfunction or nonconformity in the Covered Software, BRAZOS TECHNOLOGY shall respond as provided below:

Severity 1: Produces an emergency situation in which the Covered Software is inoperable, produces incorrect results, or fails catastrophically.

RESPONSE: BRAZOS TECHNOLOGY will provide a response by a qualified member of its staff to begin to diagnose and to correct a Severity 1 problem as soon as reasonably possible, but in any event a response via telephone will be provided within one (1) hour. BRAZOS TECHNOLOGY will continue to provide best efforts to resolve Severity 1 problems in less than forty-eight (48) hours. The resolution will be delivered to Licensee as a work-around or as an emergency software fix. If BRAZOS TECHNOLOGY delivers an acceptable work-around, the severity classification will drop to a Severity 2.

Severity 2: Produces a detrimental situation in which performance (throughput or response) of the Covered Software degrades substantially under reasonable loads, such that there is a severe impact on use; the Covered Software is usable, but materially incomplete; one or more mainline functions or commands is inoperable; or the use is otherwise significantly impacted.

RESPONSE: BRAZOS TECHNOLOGY will provide a response by a qualified member of its staff to begin to diagnose and to correct a Severity 2 problem as soon as reasonable possible, but in any event a response via telephone will be provided within four (4) hours. BRAZOS TECHNOLOGY will exercise best efforts to resolve Severity 2 problems within five (5) days. The resolution will be delivered to Licensee in the same format as Severity 1 problems. If BRAZOS TECHNOLOGY delivers an acceptable work-around for a Severity 2 problem, the severity classification will drop to a Severity 3.

Severity 3: Produces an inconvenient situation in which the Covered Software is usable, but does not provide a function in the most convenient or expeditious manner, and the user suffers little or no significant impact.

RESPONSE: BRAZOS TECHNOLOGY will exercise best efforts to resolve Severity 3 problems in the next maintenance release.

Severity 4: Produces a noticeable situation in which the use is affected in some way which is reasonably correctable by a documentation change or by a future, regular release from BRAZOS TECHNOLOGY.

RESPONSE: BRAZOS TECHNOLOGY will provide, as agreed by the parties, a fix or fixes for Severity 4 problems in future maintenance releases.

C. Maintenance Services. During the term of this Agreement, BRAZOS TECHNOLOGY will maintain the Covered Software by providing software updates and enhancements to Licensee as the same are offered by BRAZOS TECHNOLOGY to its licensees of the Covered Software under maintenance generally ("Updates"). - (5) Updates do not include:
 - (a) Platform extensions including product extensions to (i) different hardware platforms; (ii) different windowing system platforms; (iii) different operating system platforms; and

Updates will be provided in machine-readable format and updates to related documentation will be provided in hard copy form. All such deliveries shall be made electronically to the installed computers automatically during a sync process. Licensee agrees to sync each device no less than once per month to obtain any software or configuration changes. Duplication, distribution and installation of documentation updates are the responsibility of Licensee. If requested, BRAZOS TECHNOLOGY will provide on-site assistance in the installation of Updates on a time and materials basis, plus expenses.

BRAZOS TECHNOLOGY will provide support services for previous releases for a minimum period of six (6) months following the general availability of a new release or software update. After this time, BRAZOS TECHNOLOGY shall have no further responsibility for supporting and maintaining the prior releases.

A. For Non-BRAZOS TECHNOLOGY Problems. In the event that Licensee notifies BRAZOS TECHNOLOGY of a problem experienced by Licensee in connection with the operation of the Covered Software, BRAZOS TECHNOLOGY shall respond as provided in Section III.B., above. If the cause of such problem is not an error, defect or nonconformity in the Covered Software, Licensee shall compensate BRAZOS TECHNOLOGY for all work performed by BRAZOS TECHNOLOGY in connection therewith, on a time and materials basis at Brazos Technology's then current standard rates, unless otherwise agreed by the parties in writing at the time, plus expenses. Expenses for travel and travel-related expenses and individual expenses in excess of US\$500 require the prior approval of Licensee.

B. For Non-BRAZOS TECHNOLOGY Software. 1. New releases and updates to hardware vendor operating systems and other system software not listed in Exhibit A;

2. Licensee-developed software; and
3. Third-party software (except third party software embedded in the Covered Software).

VII. ACCESS

Software Maintenance is conditioned upon provision by Licensee to BRAZOS TECHNOLOGY of reasonable appropriate access to the system(s) running the Covered Software, including, but not limited to, passwords, system data, file transfer capabilities, and remote log-in-capabilities. BRAZOS TECHNOLOGY will maintain security of the system and use such access only for the purposes of this Agreement and will comply with Licensee standard security procedures. All such reports and requests will be made through the authorized individuals (up to two [2] per site), designated by Licensee in Exhibit B, who may be changed by Licensee from time to time by written notice to BRAZOS TECHNOLOGY. A twenty-four (24) hour Support Center HOTLINE is provided for problem reporting outside of normal business hours.

If changes have occurred, BRAZOS TECHNOLOGY will adjust and/or amend Exhibit A and Exhibit C, and maintenance fees will be adjusted accordingly.
