- Unless otherwise stated in the plans, flags attached to signs are REQUIRED.
  - TCP (2-4b) shall be used only on projects that will be at a location for less than two weeks.
  - Existing pavement markings may remain in place for projects less than two weeks in duration.
  - The FROW ONE LANE LEFT (or RIGHT) sign may be used following the Right (or Left) Lane Closed xxx ft sign. Spacing distance between signs should be the minimum distance indicated.
  - Downstream taper is optional. When used, it should be 100' minimum length per taper.
  - For intermediate term situations, when it is not feasible to remove and restore pavement markings, the channelization must be more prominent by using a very close stockpile. This is especially important in locations of conflicting frontage road, shoulder locations, a major approach device spacing of 10 feet is recommended. The 0 foot channelizing device spacing recommendation is intended for the area of conflicting information and not the entire work zone.
