- 2.18 Assignment-Delegation: No right or interest in an order shall be assigned or delegation of any obligation made by Seller without the written permission of Fort Bend County. Any attempted assignment or delegation by Seller shall be wholly void and totally ineffective for all purposes unless made in conformity with this paragraph.

- 2.24 Right to Assurance: Whenever the County in good faith has reason to question the other party's intent to perform. The County may demand that the other party give written assurance of his intent to perform. In the event that a demand is made and no assurance is given within five (5) days, the County may treat this failure as an anticipatory repudiation of the contract.
- 2.25 Venue: Both parties agree that venue for any litigation arising from this contract shall lie in Richmond, Fort Bend County, Texas.
- 2.26 Prohibition Against Personal Interest in Contracts: No officer or employee of the County shall have a financial interest, direct or indirect, in any contract with the County, or shall be financially interested, directly or indirectly, in the sale to the County of any land, materials, supplies, or service, except on behalf of the County as an officer or employee. Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

Initials of Bidder:

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

10.14 Lime and Lime Slurry - #264

Description: This item establishes the requirements for commercial lime slurry of the type and grade considered suitable for use in the treatment of natural or processed material or mixtures for sub-grade, sub-base and base contraction.

Types: The various types and grades are defined and identified as follows:

- a. Type A, Hydrated Lime, a dry powdered material consisting essentially of calcium hydroxide.
- b. Type B, Commercial Lime Slurry, a liquid mixture of essentially hydrated lime solids and water in slurry form.
- c. Type C, Quicklime, a dry material consisting essentially of calcium oxide. It shall be furnished in either of two grades which differ in sizing.
- d. Grade DS, "pebble" quicklime of a graduation suitable for either "Dry Placing" or for use in the preparation of slurry for "Wet Placing".
- e. Grade S, finely-graded quicklime for use in the preparation of a slurry for wet placing. (Note: Due to the possibility of appreciable amounts of finely divided, powdered quicklime being present in this product, the use of Type C, Grade S Quicklime is restricted to "Slurry Placing" only. It is considered to be unsuitable for "Dry Placing".)

General: Lime shall be applied as provided for in the governing specifications, as a mixture of lime solids and water in the form of lime slurry.

For wet application, lime slurry may be delivered to the job site as Type B, Commercial Lime Slurry or a lime slurry may be prepared at the job site or other location approved by the Engineer, by using Type A Hydrated Lime or Type C Quicklime as specified.

The lime and lime slurry being furnished under the terms of this specification shall, in addition to all other requirements, also meet the following chemical and physical requirements.

Chemical:

	Type A	Type B	Type C
Total "active" lime content, % by wt ----- (i.e., % by wt Ca(OH) ₂ + % by wt CaO, if present)	90.0 min ¹	87.0 min ²	-
Unhydrated lime content, % by wt CaO: -----	5.0 max	-	87.0 min
"Free Water" content, % by wt H ₂ O: -----	5.0 max	-	-

Physical: (Wet sieve requirement, as % by wt residue):

Retained on No. 6 (33360 micron) sieve: -----	0.2 max	0.2 max ²	8.0 max ³
Retained on No. 30 (590 micron) sieve: -----	4.0 max	4.0 max ²	-

Physical: (Dry sieve requirement, as % by wt residue):

Retained on a 1-inch (25 mm) sieve: -----	-	-	0.0
Retained on a 3/4 inch (19.0 mm) sieve: -----	-	-	10.0 max
Retained on a No. 100 (150 micron) sieve: -----	-	-	Grade DS-80% min. Grade S- no limits

Note 1: No more than 5.0% by weight CaO (unhydrated lime) will be allowed in determining the total "active" lime content.

Note 2: In "solids content" of the slurry.

Note 3: The amount of total "active" lime content, as CaO, in the material retained on the No. 6 sieve must not exceed 2.0 percent by weight of the original Type C lime.

Type B, Commercial Lime Slurry or a slurry prepared at the job site from Type A Hydrated Lime of Type C Quicklime shall be furnished at or above the minimum "Dry Solids" content as approved by the Engineer and must be of a consistency that can be handled and uniformly applied without difficulty. The slurry shall be free of liquids other than water and any materials of a nature injurious or objectionable for the purpose intended.

The use of carbide lime or by-product lime is prohibited.

Grade 1: The "Dry solids" content shall be at least 31% by weight of the slurry and the quantity of lime will be calculated by the ton of 2,000 lbs., based on the 31 percent dry weight solids.

Initials of Bidder: 

Grade 2: The "Dry solids" content shall be at least 35% by weight of the slurry and the quantity of lime will be calculated by the ton of 2,000 lbs., based on the 35 percent dry weight solids.

Grade 3: The "Dry solids" content shall be at least 46% by weight of the slurry and the quantity of lime will be calculated by the ton of 2,000 lbs., based on the 46 percent dry weight solids.

Sampling and Testing: The sampling and testing of lime shall be as determined by Test Method Tex-600-J, "Lime Testing Procedure".

Measurement and Payment: Lime will be measured and paid for at the unit price bid per ton of 2,000 lbs., dry weight of "lime" of the type specified, which price shall be fully compensation for supplying the lime, for all mixing, spreading, drying, application of the lime, water content of the slurry, for all manipulations required, for all hauling, and freight involved., for all tools, equipment and labor and for all incidentals necessary to satisfactorily complete the work, except as hereinafter specified. Hauling and freight involved in delivery of the slurry, shall be paid as a separate bit item in a per mile, per ton of dry solid weight basis, measured from the loading or mixing site to the specified job site.
