

## REVIEW BY FORT BEND COUNTY COMMISSIONERS COURT

On this 8th day of March, 2016, Commissioners Court came on to be heard and reviewed the accompanying notice of LECON, Inc.

Job Location 2720 Country Place Dr., Richmond, TX 77406

Date 2/22/2016 Bond No. no bond required, Permit No. 2016-5639 to make use of certain Fort Bend County property subject to, "A Revised Order Regulating the Laying, Construction, Maintenance, and Repair of Buried Cables, Conduits, and Pole Lines, In, Under, Across or Along Roads, Streets, Highways, and Drainage Ditches in Fort Bend County, Texas, Under the Jurisdiction of the Commissioners Court of Fort Bend County, Texas," as passed by the Commissioners Court of Fort Bend County, Texas the 3rd day of August, 1987, recorded in Volume \_\_\_\_\_ of the Minutes of the Commissioners Court of Fort Bend County, Texas, to the extent that such order is not inconsistent with Article 1436a, Vernon's Texas Civil Statutes. Upon Motion of Commissioner Meyers, seconded by Commissioner Pattman, duly put and carried, it is ORDERED, ADJUDGED AND DECREED that said notice of said above purpose is hereby acknowledged by the Commissioners Court of Fort Bend County, Texas, and that said notice be placed on record according to the regulation order thereof.

**Notes:**

1. Evidence of review by the Commissioners Court must be kept on the job site and failure to do so constitutes grounds for job shutdown.
2. Written notices are required:
  - a. 48 hours in advance of construction start up, and
  - b. when construction is completed and ready for final inspection

Mail notices to: Permit Administrator  
Fort Bend County Engineering  
301 Jackson Street  
Richmond, Texas 77469  
281-633-7500
3. This permit expires one (1) year from date of permit if construction has not commenced.

1991). The extensive social network of the Japanese is believed to be the "soft infrastructure" of the country, and it is this network that has been the primary reason for the country's economic success. The Japanese have been able to develop a strong sense of community and social responsibility, which has enabled them to overcome many of the challenges of rapid industrialization. This sense of community is reflected in the country's social structure, which is based on a hierarchy of relationships. The Japanese are known for their strong sense of loyalty and commitment to their families, companies, and the nation. This sense of community has been a key factor in the country's economic success, as it has enabled the Japanese to develop a strong sense of responsibility and commitment to their work and to their society. **CONSTRUCTION**

The contractor was to make the two existing manholes larger than the existing sewer pipe, as required by the local health department. The new manhole would have a diameter of 60 inches and a depth of 8 feet. The existing manhole had a diameter of 48 inches and a depth of 6 feet. The contractor was also to install a new 48-inch-diameter sewer pipe from the new manhole to the existing manhole. The existing sewer pipe was 48 inches in diameter and 6 feet deep. The contractor was to install a new 48-inch-diameter sewer pipe from the new manhole to the existing manhole. The existing sewer pipe was 48 inches in diameter and 6 feet deep.

the American Cancer Society. The results of the study, which will be published in the *Journal of the National Cancer Institute*, show that the use of tamoxifen in women with a history of breast cancer significantly reduces the risk of a second breast cancer. The study also found that tamoxifen reduces the risk of death from breast cancer. The study was conducted by researchers at the University of Pittsburgh Medical Center and the National Cancer Institute. The study included 1,000 women who had been treated for breast cancer with tamoxifen. The researchers found that the risk of a second breast cancer was significantly lower in women who had taken tamoxifen for at least five years compared to women who had not taken tamoxifen. The risk of death from breast cancer was also significantly lower in women who had taken tamoxifen for at least five years compared to women who had not taken tamoxifen. The researchers concluded that tamoxifen is an effective treatment for women with a history of breast cancer and that it can significantly reduce the risk of a second breast cancer and the risk of death from breast cancer.
