COMMUNITY IMPACT

Have you unsuccessfully reached out to the city for funds to purchase the equipment?

No, we have not reached out to the the county for these funds. At the time of the floods, the County Operating budget process was already underway for the upcoming fiscal year.

Was there a particular instance where a life would have been positively impacted if you would have had the equipment available?

In May of 2016, Fort Bend County experienced significant rainfall which led to the Brazos river rising to elevated levels. The river rose above 54 feet which flooded most of the unincorporated areas. These floods affected approximately 50,000 people in our area. Rescue missions were conducted in several neighborhoods, road were shut down for several days, and areas were blocked off and became restricted to our community. These life jackets and barricades would have been extremely beneficial during this

What positive effects will the equipment specifically have? Please use statistics when possible.

In June 2016, FEMA declared a Federal Disaster Declaration for Texas Counties. During this flood, there was over 148 square miles flooded, \$13.9 million infrastructure damage, 1,245 damaged homes, and 50,000 people impacted. According to the US Coast Guard, 9 out of 10 drownings occur on inland waters. Also reported, In surrounding counties, there were 6 deaths of people who drove through high waters.
