2.2 All employees of Contractor shall have such knowledge and experience as will enable them to perform the duties assigned to them. Section 7. Termination

7.1 Termination for Convenience – County may terminate this Agreement at any time upon thirty (30) days written notice.

7.2 Termination for Default

7.2.1 County may terminate the whole or any part of this Agreement for cause in the following circumstances:

7.2.2 If, after termination, it is determined for any reason whatsoever that Contractor was not in default, or that the default was excusable, the rights and obligations of the parties shall be the same as if the termination had been issued for the convenience of the County in accordance with Section 7.1 above.

7.3 Upon termination of this Agreement, County shall compensate Contractor in accordance with Section 3, above, for those services which were provided under this Agreement prior to its termination and which have not been previously invoiced to County. Contractor shall promptly furnish all such data and material to County on request.

Section 9. Inspection of Books and Records

Contractor will permit County, or any duly authorized agent of County, to inspect and examine the books and records of Contractor for the purpose of verifying the amount of work performed under the Scope of Services. County's right to inspect survives the termination of this Agreement for a period of four years.

Dear Mr. Zwahr,

Thank you for allowing Maintenance Solutions to offer the following proposal. I trust that you will be satisfied with our proposal and allow us to complete the work listed within.

Existing Conditions:

- The area is an in use correctional facility kitchen, with concrete slab foundation. Currently, the quarry tile that is in place, is in poor condition, with grout almost non-existent in some areas. There is water intrusion underneath the in place tile. The customer desires MSI to remove all of the existing tile and all thin-set/float/adhesive underneath, to expose bare concrete slab. If drain adjustment is required, the customer will be responsible to have adjusted at their own costs.
- No slope-to-drain is required in this project as we understand. If the slope to drain is desired, there will be additional charges. The condition of the concrete beneath the tile is unknown. If there is any work outside of a normal installation, additional charges will apply. Any excessive patching, or filling or electrical, plumbing etc. Any cracks generating from the underlying concrete slab are considered a structural existing condition and is not covered under warranty.
- The kitchen will be shut down to have the floors re-surfaced and whatever equipment that can be removed (1 move out and 1 move in), will be temporarily re-located by MSI sub contractor. MSI will work around remaining equipment that cannot be moved as best as possible. Any areas that cannot be properly prepared due to remaining equipment is not included in our warranty. Once MSI is complete, MSI' sub-contractor will reinstall the kitchen equipment in original locations, and the equipment will be operational. If the customer desires for the equipment to be reinstalled in a different location, charges will apply.
- The client has requested a proposal to prepare all surfaces of the concrete, and install the 8" high cove base and finally, install the 1/2" polyurethane concrete flooring, leaving a desirable slip-resistant finish. Final color to be selected from the manufacturer's standard color chart. If the floor exceeds 1/2" thick added cost will apply.
- To install the 8" cove, MSI will have to grind off the glazed finish on the cinder block by mechanical means.
- A thorough wash down of the surface will be required by the client prior to our arrival, along with a neutral degreaser, to rid the surface of any sugars, oils or other contaminants. Any remaining water is to be squeegeed to drain so the floor will be dry upon arrival.
- The client is to provide all electrical power required to energize our equipment (including connections, dis-connections, breakers, etc.) If power cannot be provided, a generator can be provided for additional costs. A waste dumpster for all waste generated is to be provided at the customer's own cost. MSI will provide dumpster and payment and performance bond. Jail has stated that they will provide power.
- The flooring will be done in 2 sections so that there will be storage for all of the kitchen equipment during these processes. The floor will be divided into Area 1 and Area 2. If additional splits are required, additional costs will apply.
- The proposal is broken into the following bids; **(see Bid 1)** Removal of existing quarry tile to bare concrete only **(see Bid 2)** for Area 1 & 2 flooring only, **(see Bid 3)** for Area 1 & 2 for 8" coving only.
- The equipment removal and installation will be done by a subcontractor of MSI. Hourly rates will apply. Any parts or additional materials will be additional charges. **(see Bid 4)**
- All work is to be completed during weekday regular hours to avoid overtime costs.
- The estimated square footage is;

(Area 1) 2,000 ft2 flooring & 200 linear feet of 8" cove for tiled area	
(Area 2) 5,265 ft2 flooring & 700 linear feet of 8" cove for bare concrete area	
Total floor: 7,265 square feet	Total Cove: 900 linear feet

All equipment and personnel are to be removed from the work area, prior to our arrival. The area is to be broom swept and free of any construction related debris. The area must be completely dry from any moisture as possible. Additional footage can be completed for added cost. Dumpster for waste must be in very close proximity to work area. MSI is a Star Certified Applicator for Flowcrete.

We hereby submit specifications and estimate for the preparation and application of items listed:

1. Remove existing quarry tile to bare concrete. **(see Bid 1)**
2. Prepare the surface by mechanical means (shot-blaster, diamond grinder, etc.)
3. Key cut 1/4" x 1/4" grooves into the surface at all edges and terminations to lock the coating system to the existing concrete slab.
4. Install Flowcrete's Flowfresh HF at 1/2" to provide desired floor by the owner. **(see Bid 2)**
5. Install 8" cove base **(see Bid 3)**
6. Allow the coating to properly dry and return to normal operating service.

7. After completion, remove all pails, equipment, tape, paper, etc.
