

**REVIEW BY FORT BEND COUNTY
COMMISSIONERS COURT**

**Fort Bend County
Engineering Department**
301 Jackson Suite 401
Richmond, Texas 77469
281.633.7500
Permits@fortbendcountytx.gov

- Right of Way Permit
- Commercial Driveway Permit

Permit No: 2017-13416

Applicant: PS Light Wave, Inc.

Job Location Site: Fairbreeze Drive, Katy, TX 77494

Bond No. 1212000 **Date of Bond:** 12/13/2016 **Amount:** \$50,000.00

The above applicant came to make use of certain Fort Bend County property subject to, "The Order Regulating the Laying, Construction, Maintenance, and Repair of Buried Cables, Conduits, and Pole Lines, In, Under, Across or Along Roads, Streets, Highways, and Drainage Ditches in Fort Bend County, Texas, Under the Jurisdiction of the Commissioners Court of Fort Bend County, Texas," as passed by the Commissioners Court of Fort Bend County, Texas, of the Minutes of the Commissioners Court of Fort Bend County, Texas, to the extent that such order is not inconsistent with Chapter 181, Vernon's Texas Statutes and Codes Annotated.

Notes:

1. Evidence of review by the Commissioners Court must be kept on the job site and failure to do so constitutes grounds for job shutdown.
2. Written notices are required:
 - a. 48 hours in advance of construction start up, and
 - b. When construction is completed and ready for final inspection, submit notification to Permit Administrator thru MyGovernmentOnline.org portal.
3. This permit expires one (1) year from date of permit if construction has not commenced.

On this 9th day of May, 2017, Upon Motion of Commissioner Meyers, seconded by Commissioner Morales, duly put and carried, it is ORDERED, ADJUDGED AND DECREED that said notice of said above purpose is hereby acknowledged by the Commissioners Court of Fort Bend County, Texas, and that said notice be placed on record according to the regulation order thereof.

Signature

Presented to Commissioners Court and approved.

TYPICAL USAGE

MOBILE	SHORT STATIONARY	INTERMEDIATE STATIONARY	LONG TERM STATIONARY
✓	✓	✓	✓

GENERAL NOTES

1. Flaggers stationed to signs where shown or required.
2. All traffic control devices illuminated or required, except those shown with the maintenance work, when observed by the Engineer.
3. The C20-4 "BE PREPARED TO STOP" sign may be installed either the C20-40 "ONE LANE ROAD AHEAD" sign, but proper sign spacing shall be maintained.
4. If the work zone is in a narrow lane, the C20-10 "ONE LANE ROAD AHEAD" sign may be used in lieu of the C20-40 sign.
5. A Stop Sign with a TMA should be used only if it can be positioned 50 to 100 feet in advance of the work. If workers are no longer present and road work conditions may be established for the Stop Sign, the Stop Sign should be removed.
6. Additional Stop Sign with TMA may be positioned at the paved surface, next to those shown in order to prevent wider work spaces.

TCP (1-2b)

7. R1-2 "YIELD" sign traffic control may be used on projects with approaches that have adequate sight distance. For projects in urban areas, work spaces should be no longer than one half city block. In rural areas on roadways with less than 2000 ADT, work spaces should be no longer than 1/2 mile. R1-2 "YIELD" sign with R1-2P "TO OBTAIN TRAFFIC" plates shall be placed on a support or a 7 foot minimum mounting height.

TCP (1-2c)

8. R1-2 "YIELD" sign traffic control may be used on projects with approaches that have adequate sight distance. For projects in urban areas, work spaces should be no longer than one half city block. In rural areas on roadways with less than 2000 ADT, work spaces should be no longer than 1/2 mile. R1-2 "YIELD" sign with R1-2P "TO OBTAIN TRAFFIC" plates shall be placed on a support or a 7 foot minimum mounting height.

TCP (1-2d)

9. Flaggers should use the most rapid or other method of communication to control traffic.

10. Length of work space should be based on the ability of flaggers to communicate.

11. If the work space is located near a horizontal curve or vertical curve, the buffer distances should be increased in order to maintain adequate stopping sight distance for the flagger.

12. Channelizing devices on the center-line may be omitted when a pilot car is leading traffic and approved by the Engineer.

13. Flaggers should use 24" STOP/SLOW paddles to control traffic. Flaggers should be visible to emergency situations.

CONVENTIONAL SIGNS ONLY (Rounded off)

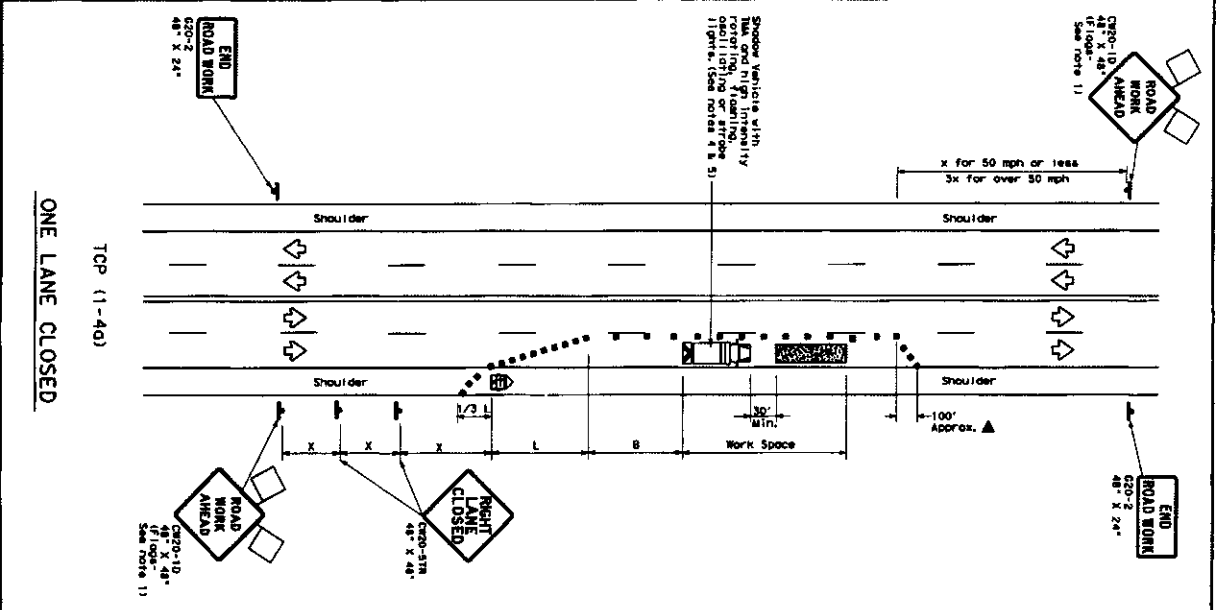

* Top of sign should be 4' above the finished ground surface.

L = Length of Sign (ft) W = Width of Sign (ft) S = Speed (mph)

Posted Speed (mph)	Sign Type	Sign Length (ft)	Sign Width (ft)	Sign Spacing (ft)	Sign Spacing (ft)	Sign Spacing (ft)
30	R1-2	150	150	150	150	150

GENERAL NOTES

- Flagger stations to signs shall be shown on drawings.
- All traffic control devices illustrated are REQUIRED, except those identified as optional.
- The "Road Work Ahead" sign may be replaced by the "Right Lane Closed" sign if the work zone is less than 1000 feet.
- Visibility of the work zone shall be maintained at all times.
- Shadow vehicle with tam and night intensity for lighting, flashing, and reflective devices shall be used on the closed lane.
- Signs shall be placed in the work zone in the following order: 1. Right Lane Closed, 2. Left Lane Closed, 3. Right Lane Closed, 4. Left Lane Closed, 5. End Road Work.
- Signs shall be placed in the work zone in the following order: 1. Right Lane Closed, 2. Left Lane Closed, 3. Right Lane Closed, 4. Left Lane Closed, 5. End Road Work.
- Signs shall be placed in the work zone in the following order: 1. Right Lane Closed, 2. Left Lane Closed, 3. Right Lane Closed, 4. Left Lane Closed, 5. End Road Work.
