Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Initials of Bidder: 

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

Initials of Bidder: 

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

13.0 PERMITS:

It shall be the sole responsibility of the successful bidder to obtain all required permits in the name of Fort Bend County.

14.0 AWARD:

This contract will be awarded to the overall lowest and best bidder meeting specifications.

15.0 REQUIRED SERVICES:

- 15.1 Contractor shall furnish, deliver and install, as needed, hydro-insensitive foam materials necessary for lifting and undersealing concrete slabs and pavement throughout various Fort Bend County locations in accordance with the following specifications detailed within. The contractor shall meet or exceed the parameters of the specifications desired herein (see section 15.0).
- 15.2 The material used for lifting and undersealing concrete slabs and pavements must be a high density hydro-insensitive polyurethane formulation material (see section 15.0). This material will contain a water insoluble diluting agent which creates a reactive formation of dimensionally stable polymer in the presence of excess water. The material must expand to fill any voids or fissures, level concrete, seal pipes, and restore load capacity. The required material must be environmentally safe forcing water out of the effected area. The material must not be affected by water or allow water penetration after the material has been used to treat an affected area. These items shall also govern the polyurethane foam materials used for the lifting and undersealing of concrete slabs and pavements (see section 15.0).
- 15.3 The bidder(s) will be required to submit the manufacturer's specifications of the material submitted for bid. This material must be certified by the manufacturer as high density hydro-insensitive polyurethane foam. In the event of any installation, it is required that the awarded contractor conform to those specifications and standards developed by the manufacturer of the material. Installation and labor of this material will be the responsibility of the awarded contractor (see section 15.0). The execution

of any job to be provided by the contractor shall begin within five (5) working days of notification. The delivery of material to be provided by the contractor shall be within fourteen (14) calendar days of notification.

16.0 SPECIFICATIONS:

16.1 Description: This item shall govern the raising and undersealing of concrete slabs.

16.2 Material: The materials used for raising concrete slabs shall be a high density hydro-insensitive polyurethane formulation.

16.3 The high density hydro-insensitive polyurethane shall exhibit the following physical characteristics and properties:

16.3.1 Properties:

16.3.3 Equipment: A listing of lifting and undersealing equipment shall be submitted to the Road Commissioner for review. The minimum list of equipment required shall be as listed below. The listing is a minimum and shall not preclude the use of additional equipment.

- 16.3.3.1 A pneumatic drill, capable of drilling 5/8" diameter holes.
- 16.3.3.2 A truck mounted pumping unit capable of injecting the high density polyurethane formulation between the concrete pavement and the subbase and capable of controlling the rate of rise of the pavement.
- 16.3.3.3 A laser leveling unit used to ensure that the concrete is raised to an even plane and to the required elevations.

16.3.4 Construction Methods:

- 16.3.4.1 Preparation. Prepare a profile of the street or road to determine where the concrete pavement needs to be raised.

Initials of Bidder: 

- 16.3.4.2 Barricades. Before commencing work, the contractor shall furnish, place and maintain adequate standard warning signs, lights, and flagmen, if necessary, in accordance with the "Manual for Uniform Traffic Control Devices". Where barricades are left on the site overnight, blinking lights shall be left on from sunset to sunrise. No separate payment shall be made for furnishing traffic control devices and flagmen. They shall be considered incidental to the work.
- 16.3.4.3 Drilling. The injection holes shall be drilled in the following manner. A series of 5/8" holes will be drilled at about six to eight foot intervals through the concrete. The exact location and spacing of the holes shall be determined by the contractor. The drilling of the holes shall be considered incidental to this item.
- 16.3.4.4 Injecting. The high density polyurethane formulation is then injected under the slab. As the high density polyurethane chemically reacts, it expands and hardens, exerting the necessary lifting forces. The amount of rise shall be controlled, using the pumping unit, by regulating the rate of injection of the high density polyurethane material. When the nozzle is removed from the hole, any excessive polyurethane material shall be removed from the area and the hole sealed with a non-expansive cementitious grout.
- 16.3.4.5 After the high density polyurethane material has set, the Road Commissioner or his representative will test the surface of the pavement with a 10 foot straight edge placed parallel to the centerline. In no case shall the maximum ordinate from a 10 foot straight edge to the pavement be greater than 1/4 inch. A tight string line may be used to monitor and verify elevations for a slab length of 50 feet or less. For longer sections, a laser lever will be used to monitor and verify elevations. Elevations can also be verified by flooding the area to confirm that the paving has been realigned properly.
- 16.3.4.6 The contractor shall be responsible for any pavement blowouts, excessive lifting, and/or uneven pavement that cause ponding, which is result of the raising of the pavement and shall repair or fix the damaged area to the satisfaction of the Road Commissioner, without additional cost to Fort Bend County.
- 16.3.4.7 Set-time. The high density polyurethane formulation used

Initials of Bidder: 

shall set and obtain 90% of its ultimate compressive strength within fifteen (15) minutes from injection.

16.3.4.8 Grade Control. Control the final elevations within ¼ inch of the proposed profile elevations. The Road Commissioner or is representative my check the treated area to confirm that the pavement has been aligned properly to facilitate drainage.

16.3.5 Guarantee: The contractor agrees to replace, without cost to the County, any work found to be improper or defective and to make good all damage or other work caused by such replacement. The guarantee period for the work is one (1) year from date of placement.

16.3.6 Measurement: The high density polyurethane material shall be paid for by the pound, which will include furnishing and injecting material.

16.3.7 Payment:

16.3.7.1 The quantity of material to be paid for shall be the quantity actually used, based on the contract unit price shown on the bid form.

16.3.7.2 Only high density polyurethane shall be paid for directly. All other labor, tools, equipment and incidentals including furnishings and operating elevation control devices, drilling of holes; furnishings and installing traffic control devices necessary for the completion of the work shall not be paid for directly, but shall be considered incidental to this item.

16.3.7.3 The description for this item is: High density polyurethane (raising/undersealing concrete slabs).

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.
