If you do not submit your application, it will remain in "In Progress" status, and **will not be reviewed by Maddie's Fund.**

Project Information

Please provide a project title for this application: From Field to Home

How much funding are you requesting to implement this lifesaving program (not to exceed \$5,000)? \$3,550.00

Approximately how many additional animal lives will be saved as a result of implementing this lifesaving program? 300

Which lifesaving program are you applying to implement? (You must select one of the below categories or your application will not be accepted.) Innovative Training, Development and Leadership Growth

What are you trying to achieve and in what timeframe?
 After attending the 2019 American Pets Alive! Conference, Fort Bend County Animal Services (FBCAS) is determined to develop a more proactive Return To Owner program from the field. We would like to purchase microchip scanners for the animal control vehicles and, if funds allow, for certain fire stations and law enforcement offices. We would also like to purchase door hangers to promote this program. We hope to return at least 300 pets (50 pets x 6 officers) over a 12 month period. FBCAS officers do not currently have scanners in their vehicles. Providing scanners and descriptive "pet found" door hangers for nearby homes would help FBCAS divert more pets from the shelter and return them to their homes. Providing scanners for select fire and law enforcement offices would give the public more opportunities to aid in reuniting a found pet with its owner, thus diverting more pets from shelters. The approximate cost for eight microchip scanners (\$400/each) and 1000 custom door hangers (\$350) is \$3,550.

How will you measure or evaluate your outcomes?
 Fort Bend County Animal Services is currently developing a tracking system to measure the number of pets that are returned thanks to the microchip scanners in the field and door hangers. We will compare this metric to the previous year's intake for the same areas of Fort Bend County. FBCAS is working diligently to develop this tracking system so that if this application is approved, the system will be ready for implementation when the program begins.
