AGENDA OVERVIEW

Our agenda will be organized around these five core ideas:

Evolving the Odyssey Foundation

Core to the success of all clients is the continuous evolution of Odyssey itself. Trends such as enabling more capabilities in the cloud, and embracing open systems are key.

Data & Outcomes

A major area of opportunity for courts is how to better leverage existing data to measure results, improve outcomes, and increase transparency.

Reimagining Civil Courts

Increased use of web-based tools and court automation provide courts new ways to provide access to justice and to make court efficient.

Empowering Legal Professionals

Another area of innovation is the improvement of services provided to the legal community - beyond e-filing and simple web access.

Connecting With Justice Partners

An open platform that connects justice partners for an integrated justice system is often discussed as a holy grail that allows all parties to be more efficient and effective.
