EXHIBIT A - ADDITION SCOPE OF WORK & COMPENSATION

Maintenance Monitoring Project Monthly Maintenance Scope of Work

General Description

The Authority has recently expanded the Intelligent Transportation System (ITS) system along all three roadways by installing a Speed and Volume Detection (SVD) system that includes (23) Bluetooth sites, (19) additional CCTV sites, and (9) radar sites. This expansion will require continual operation and maintenance support. The proposal below details TransCore's approach to maintaining the Authority's fully integrated ITS system.

Project Description

Daily monitoring of all the ITS components will include the following by the MMC:

- 24/7 Maintenance Monitoring
 - MMC will receive calls and emails regarding any updates
- ITS system checks - 3 times/day
 - Verify system uptime
 - General remote system troubleshooting
 - Create work orders and dispatch maintenance technicians to resolve equipment issues
 - **When dispatched, all technician hours will be logged in the work orders and billed in accordance with Supplemental Agreement No. 3, table included below.**

The Authority will still have full user access via TransSuite but would have the peace of mind knowing the system up time is being optimized.

Price Detail

Payments for the proposed maintenance monitoring will be included as a separate line item in the monthly maintenance invoices. All prices subject to annual Consumer Price Index (CPIW) for Urban Wage Earners price adjustment per the US Department of Labor.

Monthly Monitoring Fee: Includes all current ITS components
