It shall be based on all factors, which have a bearing on price and performance of the items in the user environment. All bids are subject to tabulation by the Fort Bend County Purchasing Department and recommendation to Fort Bend County Commissioners Court. Default may be construed as, but not limited to, failure to deliver the proper goods and/or services within the proper amount of time, and/or to properly perform any and all services required to Fort Bend County's satisfaction and/or to meet all other obligations and requirements. Contracts may be terminated without cause upon thirty (30) days written notice to either party unless otherwise specified.
- 1.33 Recycled Materials: Fort Bend County encourages the use of products made of recycled materials and shall give preference in purchasing to products made of recycled materials if the products meet applicable specifications as to quantity and quality. - 1.35 Escalation Clause: Successful bidder may apply for a price increase to the Fort Bend County Purchasing Agent. If Seller is of the opinion that an infringement will result, he will notify Fort Bend County to this effect in writing within two days after the receiving Purchase Order. If the County does not receive notice and is subsequently held liable for the infringement, Seller will defend and save the County harmless. - In the event of a Force Majeure, the affected party shall not be deemed to have violated its obligations under this Agreement, and the time for performance of any obligations of that party shall be extended by a period of time necessary to overcome the effects of the Force Majeure, provided that the foregoing shall not prevent this Agreement from terminating in accordance with the termination provisions. If any event constituting a Force Majeure occurs, the affected party shall notify the other parties in writing, within twenty-four (24) hours, and disclose the estimated length of delay, and cause of the delay.
- 2.18 Assignment-Delegation: No right or interest in an order shall be assigned or delegation of any obligation made by Seller without the written permission of Fort Bend County. Any attempted assignment or delegation by Seller shall be wholly void and totally ineffective for all purposes unless made in conformity with this paragraph.

- 2.24 **Right to Assurance:** Whenever the County in good faith has reason to question the other party's intent to perform. The County may demand that the other party give written assurance of his intent to perform. In the event that a demand is made and no assurance is given within five (5) days, the County may treat this failure as an anticipatory repudiation of the contract.
- 2.25 **Venue:** Both parties agree that venue for any litigation arising from this contract shall lie in Richmond, Fort Bend County, Texas.
- 2.26 **Prohibition Against Personal Interest in Contracts:** No officer or employee of the County shall have a financial interest, direct or indirect, in any contract with the County, or shall be financially interested, directly or indirectly, in the sale to the County of any land, materials, supplies, or service, except on behalf of the County as an officer or employee. Orders Module includes details on order groups, capability to download order list into CSV or excel format, order, bibliographic and account details

Renewals Module allows online renewal function, 24/7 access and downloadable list to PDF or excel. Includes a feature that calculates costs as you move through renewal process to assist with budgetary concerns

Reports Module includes one stop location for reports, multi-file options, customized reports are also available. 24/7 access

Check In Module includes capability to check in subscriptions, add titles that are not ordered through WT Cox Information Services and also acts as another claim portal.

Our featured enhancements to our proprietary system include:

Notifications has been designed to keep you up to date with key title changes which relate specifically to your orders. This feature has been designed to allow you to view all changes or specify the start date range for the orders you wish to review.

The results will be viewable as a web page rather than a series of reports that will be out of date as soon as they are produced.

Types of changes that will be reported are:

- Delays
- Frequency
- ISSN
- Issues
- Media Type
- Name
- New Title
- Publication Resumed
- Publisher

You will be able to view the previous value and the new value of any change as well as the effective date/volume that this change took place.

You will be able to search for any of the types of changes above or return all changes and then use the sort arrow on the search results page to sequence a particular column.

All results can be exported to excel. No need to store multiple reports of notifications or emails advising of individual changes. In summary, it is your view of your changes when you want it.

A customer filter enhancement enables multi-customer organizations to more easily management subscription activity by specific locations within the organization.

RSS Feeds For Notifications

A new feature added to CoxNet allows a user to receive their Notifications via an RSS Feed. The Notifications will still be sent to CoxNet even if you select the RSS feed option.

Selecting the link will allow you to specify the method you wish to subscribe to this feed. (This will vary with your browser of choice). Most browsers do allow you to send the feed to your email account/client.

Online Subscriptions allows you to view any title that has an online component. This will show all online titles and by selecting an individual title, a detail page will be displayed to allow you to track the progress for registration and activation of that title.

There are three steps that you can record your progress in setting up access:

1. License
2. Registration
3. Confirmation of Access

Notes can be entered for each of these steps. An excel option is available to export the summary of the status for each title.

Additional enhancements include:

- Customized view of subscriptions
- Direct access to Library of Congress records
- Ability to search by Dewey Decimal Classification (DDC)
- Ability to search by LC subject classification codes
- Ability to search/filter subscriptions by Invoice Number in Subscriptions Tab
- Simplified License Detail View
- Volume/Issue information available in subscription detail screen

Each of these enhancements has been added as a part of continuing development based on customer feedback. Enhancements are ongoing at all times.

CoxNet also provides a user management module or "administrator" console to control user access. In general, an organizational account will be set up with administrative capabilities. All subaccounts will be viewable via one "Master" account and also viewable as individual subaccounts. Subaccounts and any special packages necessary are assigned a unique identifying number and may be further identified by ship to addresses, billing addresses, funding codes and a variety of other parameters. Subaccounts will be identified to your specifications. Administrative capabilities can be provided or restricted as dictated

by your library's approval processes. Librarians can be given the capability to renew, order and claim (or any combination) or can be restricted from doing so. All orders from the Library will fall under the administrative account. One master administrator should be identified. Subaccounts can be separated by ship-to, HEGIS, cost codes or internal reference codes. Reports can be generated by any common denominator.

Database records available include title, publisher, ISSN, available formats and also includes a separate title information database which is searchable in a variety of formats. Within the title database, memberships, membership titles and packages are clearly identified. The internal title information within your collection can be customized with publisher ID numbers, account numbers, invoicing information and any number of information the Library deems necessary.

Online titles include registration and access information. Additionally, a customized online access report is available to Library as part of basic service.

CoxNet records are updated daily in real time. Enhancements to the system are incorporated automatically as they occur.

ILS INTERFACE

WT Cox Information Services keeps current with all known ILS on the market and supports vendor specifications and all versions of EDI software. WT Cox Information Services offers migration assistance during the transition phase of start-up and integration capabilities are tested before implementation. Interface is offered at no charge.

A basic overview of EDI service is detailed below and an overview that is more specific to Library ILS will be identified based on your ILS. This is an example only of how EDI functionality works through WT Cox Information Services. All system interfaces will be tested during transition.

EDI Functions Client Overview

Electronic Claiming. Electronic claiming allows you to generate claims through your ILS and then send them via FTP to WT Cox, who then transmits the claims to the publishers. This method reduces staff time spent entering individual claims and provides the required claim information for the publisher.

- The electronic claiming match point is the WT Cox Persistent ID (displayed as Our Ref Number) and must be present in the **Vendor Reference Number** field of the Order record in the **Type** tab, right below the field which should say **Agent's Subscription Identifier (SNA)**. The Persistent IDs may be scanned into the records using bar codes or keyed manually.
- The library needs to make sure their WT Cox vendor code is setup properly in the order records. We will contact ILS for specific information.
- After the Persistent IDs have been entered into your ILS, WT Cox will send you the FTP address and ID numbers. The client will need to send WT Cox a test file of 3-5 claims. As test claims, they will not be sent to the publisher. WT Cox will notify you when the test has been completed successfully and you may begin claiming on a regular basis.
- WT Cox offers the option to have an automatic confirmation sent when they receive electronic claims. To receive confirmations, the client must provide W.T. Cox with the appropriate email address. We recommend you use a departmental email address rather than a personal email address.

Electronic Invoicing. Invoice information is available in electronic format to load directly into the client's ILS. This process posts payments and other invoice data to each record, eliminating time-consuming manual input. Each time an EDI invoice file becomes available, an e-mail notification is sent to the client. EDI invoices are available for download from CoxNet or may be retrieved by FTP.

The client may limit the invoice by a specific number of line items. You may want to consider a maximum of 100-500 line items per invoice.

- The match point for electronic invoicing is the **Order Record PO Number**. The PO Number must be static and unique for each title and must be entered into the ILS field of the WT Cox system. The client must supply WT Cox with an Excel file of their subscriptions, including Title, ISSN, and Order Record PO Numbers.
- If the client desires to use fund codes, they can supply them in the same Excel file as the Order Record numbers for entry into the WT Cox system.

Important to Know...

Pricing

Our service proposals utilize the most up-to-date pricing available, quoting the rate that the publisher indicates is appropriate for you. We work hard to provide accurate pricing to help you plan and budget more precisely.

Timelines & Deliverables

Most publishers require between 60-90 days for first issue receipt. We need your order 90 days prior to your start dates to reduce risk of gaps in delivery.

We place weekly orders to the publishers to ensure timely and seamless orders.

Invoice is Net 30. If special invoice options are needed, just ask your sales representative for invoice options.

Pricing Structure

We offer this pricing based on the condition we receive your list in its entirety, understanding minor changes such as additions deletions, and/or quantity changes will occur. Certain classroom instructional materials, professional journals and newspapers are generally considered non-discountable due to publisher restrictions.

Our pricing is based on the most current publisher prices at time of quote. If you see a major difference in a particular price please check with us.
