If the County does not receive notice and is subsequently held liable for the infringement, Seller will defend and save the County harmless. If any event constituting a Force Majeure occurs, the affected party shall notify the other parties in writing, within twenty-four (24) hours, and disclose the estimated length of delay, and cause of the delay.

2.18 Assignment-Delegation: No right or interest in an order shall be assigned or delegation of any obligation made by Seller without the written permission of Fort Bend County. The County may demand that the other party give written assurance of his intent to perform. In the event that a demand is made and no assurance is given within five (5) days, the County may treat this failure as an anticipatory repudiation of the contract.
- 2.25 Venue: Both parties agree that venue for any litigation arising from this contract shall lie in Richmond, Fort Bend County, Texas.
- 2.26 Prohibition Against Personal Interest in Contracts: No officer or employee of the County shall have a financial interest, direct or indirect, in any contract with the County, or shall be financially interested, directly or indirectly, in the sale to the County of any land, materials, supplies, or service, except on behalf of the County as an officer or employee. Dear Purchasing Agent,

We are in receipt of your Bid 21-072, and Covetrus North America is pleased to provide you with the attached bid for Veterinary/ Medical supplies. The following points are to further explain the conditions with which we are able to make an offer on this bid that differ on some points from your contract conditions.

Unfortunately there are some restricted items from our Manufacturing partners in which we do not have price control. These are items that are considered "Manufacturer restricted" where we are contractually obligated to price an item at the exact price the Manufacturer mandates with no deviations. As such, Covetrus is offering this bid with "prices subject to change", with the expectation that we will have the ability to update pricing throughout the contract period as needed. That said, we will always try to limit the price changes whenever possible.

We hope that our offer is given your consideration as we know we can provide you significant savings. Please let me know if you have any questions or need clarification on anything we have submitted.

Thank you for the opportunity,

- 1.18 Name Brands: Specifications may reference name brands and model numbers. It is not the intent of Fort Bend County to restrict these bids in such cases, but to establish a desired quality level of merchandise or to meet a pre-established standard due to like existing items. Bidders may offer items of equal stature and the burden of proof of such stature rests with them. Fort Bend County shall act as sole judge in determining equality and acceptability of products offered.
- 1.19 Color Selection: Determination of colors of materials is a right reserved by the using department unless otherwise specified in the bid. Initials of Bidder: RT

obviously unbalanced may be rejected. If multiple bids are submitted by a bidder and after the bids are opened, one of the bids is withdrawn, the result will be that all of the bids submitted by that bidder will be withdrawn; however, nothing herein prohibits a vendor from submitting multiple bids for different products or services.

An award is final only upon formal execution by the Fort Bend County Commissioners Court or the Fort Bend County Purchasing Agent. Fort Bend County reserves the right to withdraw any award until execution by the proper authority.

Service will commence only upon expiration of applicable warranties and should be priced accordingly.
- 1.28 Contract Obligation: Fort Bend County Commissioners Court must award the contract and the County Judge or other person authorized by the Fort Bend County Commissioners Court must sign the contract before it becomes binding on Fort Bend County or the bidders. Binding agreements shall remain in effect until all products and/or services covered by this purchase have been satisfactorily delivered and accepted.

Bidders are advised to consult the using department for instructions. Initials of Bidder: RT

provide services without a Fort Bend County Purchase Order, signed by an authorized agent of the Fort Bend County Purchasing Department. The fastest, most reasonable delivery time shall be indicated by the bidder in the proper place on the bid sheet. Any special information concerning delivery should also be included, on a separate sheet, if necessary. All items shall be shipped F.O.B. inside delivery unless otherwise stated in the specifications. This shall be understood to include bringing merchandise to the appropriate room or place designated by the using department. Every tender or delivery of goods must fully comply with all provisions of these requirements and the specifications including time, delivery and quality. Nonconformance shall constitute a breach, which must be rectified prior to expiration of the time for performance. Failure to rectify within the performance period will be considered cause to reject future deliveries and cancellation of the contract by Fort Bend County without prejudice to other remedies provided by law. Where delivery times are critical, Fort Bend County reserves the right to award accordingly.

- 1.31 Contract Extension: Extensions may be made only by written agreement between Fort Bend County and the bidder. Any price escalations are limited to those stated by the bidder in the original bid.
- 1.32 Termination: Fort Bend County reserves the right to terminate the contract for default if Seller breaches any of the terms therein, including warranties of bidder or if the bidder becomes insolvent or commits acts of bankruptcy. Such right of termination is in addition to and not in lieu of any other remedies, which Fort Bend County may have in law or equity. Default may be construed as, but not limited to, failure to deliver the proper goods and/or services within the proper amount of time, and/or to properly perform any and all services required to Fort Bend County's satisfaction and/or to meet all other obligations and requirements. Contracts may be terminated without cause upon thirty (30) days written notice to either party unless otherwise specified.
- 1.33 Recycled Materials: Fort Bend County encourages the use of products made of recycled materials and shall give preference in purchasing to products made of recycled materials if the products meet applicable specifications as to quantity and quality. Initials of Bidder: RT

Written documentation from the vendor's supplier of the increase notice must be provided to the Purchasing Agent at time of increase request. No application for a price increase may be submitted within the first six (6) months of this contract. Increase requests of more than 25% of the original bid price will not be considered.

- 1.36 Modifications: This instrument contains the entire Contract between the parties relating to the rights herein granted and obligations herein assumed. Any oral or written representations or modifications concerning this instrument shall be of no force and effect excepting a subsequent written modification signed by both parties hereto.

2.7.3 Do not include Federal Excise, State, or City Sales Tax. Fort Bend County is a tax-exempt governmental entity.

2.8 Gratuities: Fort Bend County may, by written notice to the Seller, cancel any order without liability, if it is determined by the County that gratuities, in the form of entertainment, gifts, or otherwise were offered or given by the Seller, or any agent or representative of the Seller to any officer or employee of Fort Bend County with a view toward securing an order. In the event an order is canceled by the County pursuant to this provision, the County shall be entitled, in addition to any other rights and remedies, to recover or withhold the amount of the cost incurred by Seller in providing such gratuities.

2.9 Special Tools and Test Equipment: If the price stated on the face of an order includes the cost of any special tooling or special test equipment fabricated or required by Seller for the purpose of filing this order, such special tooling equipment and any process sheets related thereto shall become the property of the County and to the extent feasible shall be identified by the Seller as such.

2.10 Warranty/Price:

2.10.1 The price to be paid by the County shall be that contained in Seller's bid which Seller warrants to be no higher than Seller's current prices on orders by others for products of the kind and specification covered by an order for similar quantities under similar or like conditions and methods of purchase. In the event Seller breaches this warranty the prices of the items shall be reduced to the Seller's current prices on orders by others. Fort Bend County may cancel this contract without liability.

- 2.10.2 The Seller warrants that no person or selling agency has been employed or retained to solicit or secure any County order based upon any agreement or understanding for commission, percentage, brokerage, or contingent fee excepting bona fide employees of bona fide established commercial or selling agencies maintained by the Seller for the purpose of securing business. A breach or violation of this warranty gives the County the right, in addition to any other right or rights, to cancel this contract without liability.
- 2.11 Warranty Product: Seller shall not limit or exclude any implied warranties and any attempt to do so shall render an order voidable at the option of the County. Seller warrants that the goods furnished will conform to the specifications, drawings, and description listed in the bid invitation and purchase order as applicable, and to the sample(s) furnished by Seller if any. In the event of a conflict between the specifications, drawings, and descriptions, the specifications shall govern.

Fort Bend County makes no warranty that the production of goods according to the specification will not give rise to such a claim and in no event shall Fort Bend County be liable to Seller for indemnification in the event the Seller is sued on the grounds of infringement or the like. If Seller is of the opinion that an infringement will result, he will notify Fort Bend County to this effect in writing within two days after the receiving Purchase Order. If the County does not receive notice and is subsequently held liable for the infringement, Seller will defend and save the County harmless. If Seller in good faith ascertains that production of the goods in accordance with the specifications will result in infringement, this contract shall be null and void except that the County will pay Seller the reasonable cost of his search as to infringements.
- 2.14 Right of Inspection: The County shall have the right to inspect the goods at delivery before accepting them.
- 2.15 Cancellation: Fort Bend County shall have the right to cancel for default all or any part of the undelivered portion of an order if Seller breaches any of the terms hereof including warranties of Seller, or if the Seller becomes insolvent or files for protection under the bankruptcy laws. Such rights of cancellation are in addition to and not in lieu of any other remedies, which Fort Bend County may have in law or

equity.

2.16 Termination: The performance of work under a Purchase Order may be terminated in whole or in part by the County in accordance with this provision. Termination of work there under shall be effected by the delivery to the Seller of a "Notice of Termination" specifying the extent to which performance of work under the order is terminated and the date upon which such termination becomes effective. Such right of termination is in addition to and not in lieu of rights of Fort Bend County set forth in Clause 15 herein.

2.17 Force Majeure: Force Majeure means a delay encountered by a party in the performance of its obligations under this Agreement, which is caused by an event beyond the reasonable control of that party. Without limiting the generality of the foregoing, "Force Majeure" shall include but not be restricted to the following types of events: acts of God or public enemy; acts of governmental or regulatory authorities; fires, floods, epidemics or serious accidents; unusually severe weather conditions; strikes, lockouts, or other labor disputes; and defaults by subcontractors.

In the event of a Force Majeure, the affected party shall not be deemed to have violated its obligations under this Agreement, and the time for performance of any obligations of that party shall be extended by a period of time necessary to overcome the effects of the Force Majeure, provided that the foregoing shall not prevent this Agreement from terminating in accordance with the termination provisions. If any event constituting a Force Majeure occurs, the affected party shall notify the other parties in writing, within twenty-four (24) hours, and disclose the estimated length of delay, and cause of the delay.

2.18 Assignment-Delegation: No right or interest in an order shall be assigned or delegation of any obligation made by Seller without the written permission of Fort Bend County. Any attempted assignment or delegation by Seller shall be wholly void and totally ineffective for all purposes unless made in conformity with this paragraph.

2.19 Waiver: No claim or right arising out of a breach of any contract can be discharged in whole or in part by a waiver or renunciation of the claim or right unless the waived or renunciation is supported by consideration and is in writing signed by the aggrieved party.

2.20 Modification: A Purchase Order can be modified or rescinded only by a writing signed by both of the parties or their duly authorized agents.

2.21 Parol Evidence: This writing is intended by the parties as a final expression of their agreement and is intended also as a complete and exclusive statement of the terms of this agreement. No course of prior dealings between the parties and no usage of the trade shall be relevant to supplement or explain any terms rendered under this agreement and shall not be relevant to determine the meaning of this agreement even

The County may demand that the other party give written assurance of his intent to perform. In the event that a demand is made and no assurance is given within five (5) days, the County may treat this failure as an anticipatory repudiation of the contract.
- 2.25 **Venue:** Both parties agree that venue for any litigation arising from this contract shall lie in Richmond, Fort Bend County, Texas.
- 2.26 **Prohibition Against Personal Interest in Contracts:** No officer or employee of the County shall have a financial interest, direct or indirect, in any contract with the County, or shall be financially interested, directly or indirectly, in the sale to the County of any land, materials, supplies, or service, except on behalf of the County as an officer or employee. Parenteral vaccines can leave dogs vulnerable to widespread canine parainfluenza virus (CPIV).¹⁻³

Parenteral vaccines do not effectively reduce shedding or infection.⁴⁻⁷

- **MORE THAN 30% OF DOGS** tested positive for CPIV in clinical diagnostic samples submitted to Cornell Diagnostic Laboratory.^{2*}

TIME TO ASK IF YOUR PATIENTS ARE REALLY PROTECTED AGAINST CPIV.

Dogs parenterally vaccinated against CPIV:

Have been shown to develop respiratory disease caused by CPIV infection¹

1

Have been shown to spread the virus to other dogs with no direct contact¹

2

May be vulnerable to other pathogens, which can cause more severe respiratory disease and occasionally death^{5,8,9}

Intranasal administration allows you to provide a step above parenteral CPIV protection.

A simple cough may be more complicated than you realize

To help protect against the many causes of canine infectious respiratory disease complex (CIRD complex), rely on the **comprehensive portfolio of vaccines from Merck Animal Health.**

CIRD complex may involve more than one pathogen¹

- In the upper respiratory tract, *Bordetella*, parainfluenza virus, and adenovirus type 2 are primary CIRD complex pathogens
- In the lower respiratory tract, CIV is an emerging cause of CIRD complex that can significantly damage the lungs

*Vaccine available.

CIRD complex is an easily acquired disease

CLINICAL SIGNS

All pathogens involved in CIRD complex can cause a similar clinical presentation

- COUGHING
- SNEEZING
- FEVER
- NASAL DISCHARGE
- OCULAR DISCHARGE

DOGS ARE AT RISK

Multiple dog environments may contribute to the development of CIRD complex

- SOCIAL DOGS
- BOARDING FACILITIES
- DOGGIE DAY CARE
- DOG SHOWS
- DOG PARKS
- GROOMERS
- KENNELS
- SHELTERS

Vaccination is key to controlling CIRD complex

Comprehensive vaccination protects in two ways

- Reduces disease signs and severity in the **dog that was immunized**¹
- Reduces shedding and spread of disease among **surrounding dogs**¹

Prevalence for potential canine respiratory pathogens from clinical diagnostic samples¹

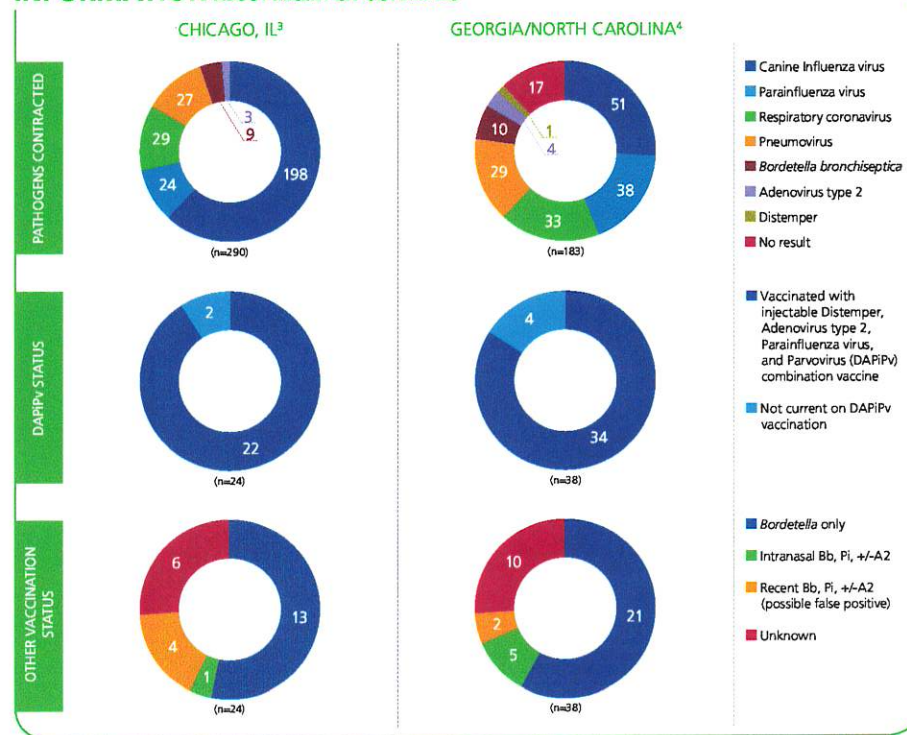

Prevalence is defined as positive percentage of all samples tested. Data include samples submitted to Cornell Diagnostic Laboratory from October 1, 2011 to October 1, 2012 (orange), IDEXX Laboratories Inc., IDEXX Canine Respiratory Disease (CRD) RealPCR™ Panel during 2012 (red), and Antech Diagnostics from January 2011 through March 2013 (green). The number of samples tested for each pathogen is as follows, where NST means not specifically tested: canine parainfluenza virus (PnV; Cornell n=499, IDEXX n=200, Antech n=NST); canine respiratory coronavirus (CRCoV; Cornell n=503, IDEXX n=4062, Antech n=2229); canine adenovirus (CAV; Cornell n=497, IDEXX n=4062, Antech n=4820); canine distemper virus (CDV; Cornell n=500, IDEXX n=4062, Antech n=4816); canine parainfluenza virus (CPiV; Cornell n=359, IDEXX n=4062, Antech n=4821); *Bordetella bronchiseptica* (Bb; Cornell n=205 via PCR and n=401 cultures, IDEXX n=4062, Antech n=4780); *Mycoplasma* (Myco; Cornell n=299, IDEXX n=4062, Antech n=4760); canine herpesvirus (CHV; Cornell n=NST, IDEXX n=4062, Antech n=4795); canine influenza virus H3N8 (H3N8; Cornell n=471, IDEXX n=4062, Antech n=2506); H1N1 influenza virus (H1N1; Cornell n=NST, IDEXX n=4062, Antech n=4715); *Streptococcus equi* subsp. *zooepidemicus* (Strep; Cornell n=NST, IDEXX n=4062, Antech n=4828). Although the large majority of results are based on PCR assays, Cornell Diagnostic Laboratory routinely performed viral isolation, and both Cornell and Antech commonly performed bacterial culture on submitted materials.

THE GROWING PREVALENCE OF CANINE INFLUENZA VIRUS (CIV) H3N2²

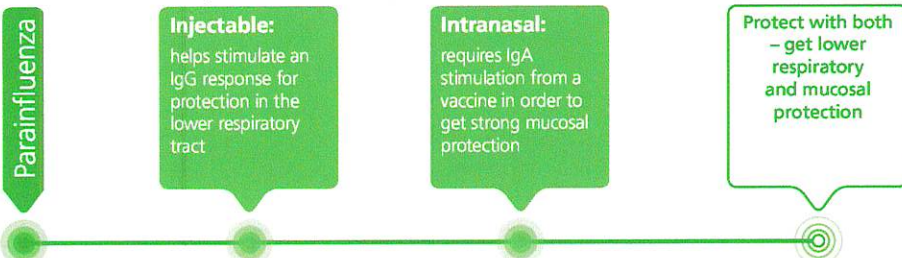

INFORMATION ABOUT RECENT CIV OUTBREAKS

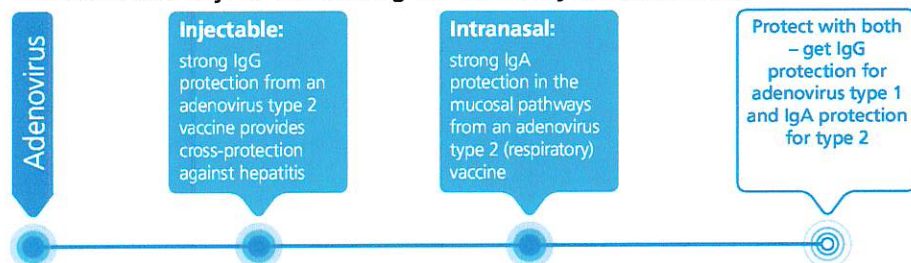

Only complete vaccination coverage ensures a healthy dog

Vaccination for *Bordetella* is not enough.

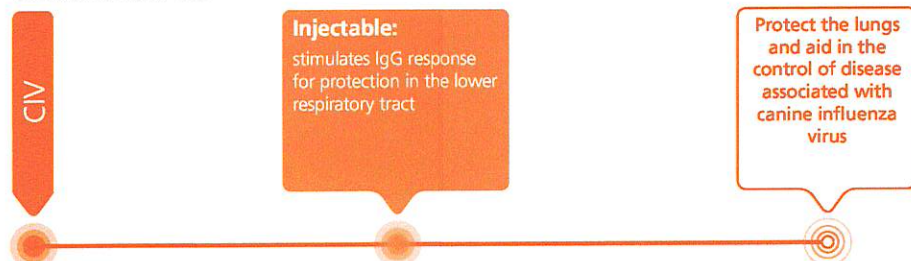

Two different ways of vaccinating are necessary for parainfluenza⁵

Two different ways of vaccinating are necessary for adenovirus⁶

Vaccinate for CIV⁷

Merck Animal Health offers a comprehensive portfolio of vaccines to protect against CIRD complex

Intranasal vaccines for the upper respiratory tract

Local administration promotes a stronger IgA response⁸

- IgA is a key protector of the nose and throat and appears to be more important than systemic responses when it comes to protecting against upper respiratory pathogens

Dogs injected against parainfluenza virus:

- Have been shown to develop respiratory disease caused by parainfluenza infection⁹
- Have been shown to spread the virus to other dogs with no direct contact⁹
- May be vulnerable to other pathogens, which can cause more severe respiratory disease and occasionally death^{10,11}

Intranasal Nobivac® Intra-Trac₃ allows you to provide a broader range of protection against *Bordetella*, parainfluenza virus, and adenovirus type 2

In a *Bordetella* study, Nobivac® Intra-Trac₃ significantly reduced cough severity, days of coughing, and nasal shedding¹²

- Nobivac® Intra-Trac₃ reduces both infection and disease
- Nobivac® Intra-Trac₃ ADT eliminates the possibility of accidental injection through unique advanced delivery technology
- Nobivac® Intra-Trac₃ KC is safe intranasal protection against *Bordetella* and parainfluenza virus and can be used safely in pregnant bitches

THE AMERICAN ANIMAL HOSPITAL ASSOCIATION RECOMMENDS INTRANASAL OVER INJECTABLE VACCINATION¹³

BORDETELLA:

“In high-risk environments (eg, shelters), intranasal *Bordetella* vaccine, in combination with parainfluenza virus vaccine, is recommended over injectable vaccine.”

PARAINFLUENZA VIRUS:

“When feasible, intranasal parainfluenza virus vaccination is recommended over parenteral vaccination.”

ADENOVIRUS TYPE 2:

“Administration of intranasal adenovirus type 2 vaccine is recommended for use in dogs considered at risk for respiratory infection.”

Intranasal Nobivac® Intra-Trac₃ provides more coverage than the leading competitors

DOI=duration of immunity.

CIV is the primary cause of CIRDC complex in the lower respiratory tract²¹

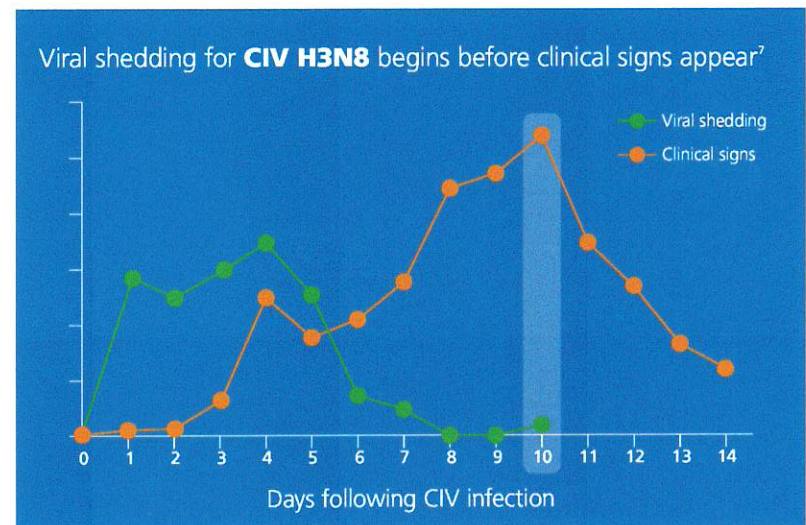

- Close to 100% of dogs are naïve to this virus and have no natural immunity to it
- Virtually all exposed dogs will be infected
- Clinical signs may be severe, and the disease is potentially fatal

CIV is hard to diagnose

Common laboratory tests like PCR, when performed after peak viral shedding, can fail to detect the virus²²

- PCR testing on nasal swabs should be done early, during the first 4 days of illness, to detect active infection
- Serology to detect antibodies to the virus is the best diagnostic method for confirming infection once clinical signs are evident (at least 7 days following onset of signs)

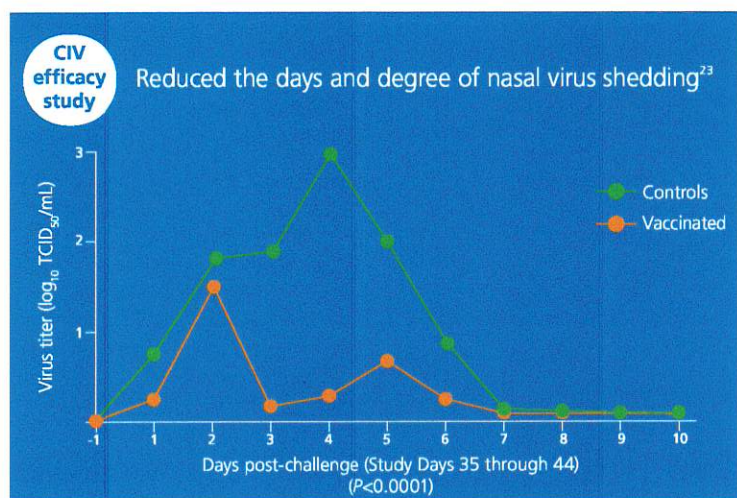

- Geometric mean virus titers (expressed as log₁₀ TCID₅₀/mL)
- Average clinical score (daily average score for all clinical signs, such as ocular discharge, nasal discharge, coughing, sneezing, and depression)

Nobivac® Canine Flu H3N8: Injectable vaccine protection for the lower respiratory tract

Nobivac® Canine Flu H3N8 is highly effective in protecting the lungs and decreasing viral shedding, which lessens the opportunity for CIV to infect other dogs²³

Nasal virus shedding was monitored in all dogs by collecting and processing swabs on the day before challenge, and then daily from Day 1 through Day 10 post-challenge.

- On Day 4, controls shed 500 times more viral particles than vaccinates
- Mean viral shedding lasted only 2 days in vaccinates vs 5 days in controls*
- Vaccinates also shed less virus overall than controls*

*Both results were shown to be statistically significant ($P < 0.0001$).

Nobivac® Canine Flu H3N8 alleviates cough and protects the lungs

- 14 of 15 controls exhibited cough²³
- Only 7 of 21 vaccinates exhibited cough²³
- Cough was mild in vaccinates; severity of cough varied in controls²³

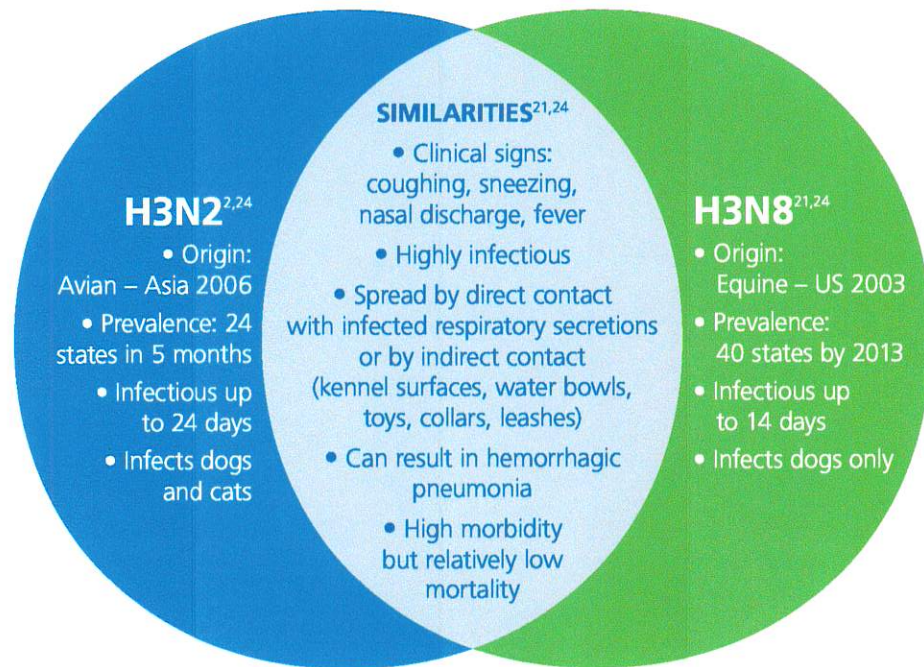

Systemic administration stimulates a strong IgG response²³

- IgG is a key protector of the lungs

- Gross lung lesions were scored as a percent consolidation of each lung lobe, and weighted scores were calculated based on an accepted scoring system
- Scores ≥ 0.8 indicated dogs had sustained lung damage
- Lung scores ranged significantly higher in controls (0-27.9) versus vaccinates (0-2.9)

1. Fast acting – Starts taking ticks to task in just a couple of hours.⁴

Efficacy, calculated by two methods, for four acaricidal treatments against adult *Rhipicephalus sanguineus* (s) ticks on dogs over the 48 h following initial treatment administration. One-way ANOVA results (lowest results compared to next lowest) are consistently afoxolaner vs Imidacloprid + permethrin: at 4 h, $P=0.0128$ "live attached efficacy;" at 8, 12, 24 and 48 h, $P<0.0001$. For "live attached and free" efficacy, one-way ANOVA results at 4 h for afoxolaner vs sarolaner: $P=0.0073$ ⁴

● Circled results are significantly lower than all other results for specific time point.

— The solid lines are the efficacy calculated using "live attached" ticks.

- - - The dashed lines are the efficacy calculated using "live attached and free" ticks.

2. Long-lasting speed of kill⁵ – Not just a tick longer ... weeks longer.

Data obtained from a European laboratory study determining the speed of kill of BRAVECTO Chew for Dogs administered once orally at a dose of 25mg/kg body weight against tick (*Ixodes ricinus*) infestations (difference from untreated control dogs. $P<0.0001$).⁵

>98% control within 12 hours for up to 12 weeks.^{2,5}

Current Pet Owner Behavior:

According to a recent study, pet owners are lapsing in administering continuous flea and tick treatment to their pets.¹

- 96% of pet owners said they are "very satisfied" or "satisfied" with BRAVECTO¹

Up to 12 weeks* of broad-spectrum protection results in better adherence and greater convenience for pet owners.¹

*BRAVECTO kills fleas and prevents flea infestations for 12 weeks. BRAVECTO Chew kills ticks (black-legged tick, American dog tick, and brown dog tick) for 12 weeks and also kills lone star ticks for 8 weeks.

3. Broad spectrum of coverage – Guards against ticks.^{6,7}

Extended duration matters.

Whereas competitive products like Simparica need to be administered on a monthly basis to be effective, BRAVECTO is effective for up to 12 weeks* of flea and tick protection with one dose.

Give your patients peace of mind and their pets longer efficacy compared to Simparica. Recommend fast-acting, nose-to-toes protection that provides up to 12 weeks* of continuous protection per dose against fleas and ticks – with BRAVECTO.

SATISFACTION GUARANTEE:

If you are not satisfied with the performance of BRAVECTO during the 12-week treatment period, for any reason, Merck Animal Health will replace or refund your purchase.

Do not eat, drink or smoke while handling the product. Wash hands thoroughly with soap and water immediately after use of the product.

Precautions:

Bravecto has not been shown to be effective for 12-weeks duration in puppies less than 6 months of age. Bravecto is not effective against *Amblyomma americanum* ticks beyond 8 weeks after dosing (see **Effectiveness**).

Adverse Reactions:

In a well-controlled U.S. field study, which included 294 dogs (224 dogs were administered Bravecto every 12 weeks and 70 dogs were administered an oral active control every 4 weeks and were provided with a tick collar); there were no serious adverse reactions. All potential adverse reactions were recorded in dogs treated with Bravecto over a 182-day period and in dogs treated with the active control over an 84-day period. The most frequently reported adverse reaction in dogs in the Bravecto and active control groups was vomiting.

Percentage of Dogs with Adverse Reactions in the Field Study

| Adverse Reaction (AR) | Bravecto Group: Percentage of Dogs with the AR During the 182-Day Study (n=224 dogs) | Active Control Group: Percentage of Dogs with the AR During the 84-Day Study (n=70 dogs) |
|-----------------------|--|--|
| Vomiting | 7.1 | 14.3 |
| Decreased Appetite | 6.7 | 0.0 |
| Diarrhea | 4.9 | 2.9 |
| Lethargy | 5.4 | 7.1 |
| Polydipsia | 1.8 | 4.3 |
| Flatulence | 1.3 | 0.0 |

In a well-controlled laboratory dose confirmation study, one dog developed edema and hyperemia of the upper lips within one hour of receiving Bravecto. The edema improved progressively through the day and had resolved without medical intervention by the next morning.

For technical assistance or to report a suspected adverse drug reaction, contact Merck Animal Health at 1-800-224-5318. Additional information can be found at www.bravecto.com. For additional information about adverse drug experience reporting for animal drugs, contact FDA at 1-888-FDA-VETS or online at <http://www.fda.gov/AnimalVeterinary/SafetyHealth>.

Clinical Pharmacology:

Peak fluralaner concentrations are achieved between 2 hours and 3 days following oral administration, and the elimination half-life ranges between 9.3 to 16.2 days. Quantifiable drug concentrations can be measured (lower than necessary for effectiveness) through 112 days. Due to reduced drug bioavailability in the fasted state, fluralaner should be administered with food.

Mode of Action:

Fluralaner is for systemic use and belongs to the class of isoxazoline-substituted benzamide derivatives. Fluralaner is an inhibitor of the arthropod nervous system. The mode of action of fluralaner is the antagonism of the ligand-gated chloride channels (gamma-aminobutyric acid (GABA)-receptor and glutamate-receptor).

Effectiveness:

Bravecto began to kill fleas within two hours after administration in a well-controlled laboratory study. In a European laboratory study, Bravecto killed fleas and *Ixodes ricinus* ticks and reduced the numbers of live fleas and *Ixodes ricinus* ticks on dogs by >98% within 12 hours for 12 weeks. In a well-controlled laboratory study, Bravecto demonstrated 100% effectiveness against adult fleas 48 hours post-infestation for 12 weeks. In well-controlled laboratory studies, Bravecto demonstrated ≥93% effectiveness against *Dermacentor variabilis*, *Ixodes scapularis* and *Rhipicephalus sanguineus* ticks 48 hours post-infestation for 12 weeks. Bravecto demonstrated ≥90% effectiveness against *Amblyomma americanum* 72 hours post-infestation for 8 weeks, but failed to demonstrate ≥90% effectiveness beyond 8 weeks.

In a well-controlled U.S. field study, a single dose of Bravecto reduced fleas by ≥99.7% for 12 weeks. Dogs with signs of flea allergy dermatitis showed improvement in erythema, alopecia, papules, scales, crusts, and excoriation as a direct result of eliminating flea infestations.

Palatability: In a well-controlled U.S. field study, which included 559 doses administered to 224 dogs, 80.7% of dogs voluntarily consumed Bravecto within 5 minutes, an additional 12.5% voluntarily consumed Bravecto within 5 minutes when offered with food, and 6.8% refused the dose or required forced administration.

Animal Safety:

Margin of Safety Study: In a margin of safety study, Bravecto was administered orally to 8- to 9-week-old puppies at 1, 3, and 5X the maximum label dose of 56 mg/kg at three, 8-week intervals. The dogs in the control group (0X) were untreated.

There were no clinically-relevant, treatment-related effects on physical examinations, body weights, food consumption, clinical pathology (hematology, clinical chemistries, coagulation tests, and urinalysis), gross pathology, histopathology, or organ weights. Diarrhea, mucoid and bloody feces were the most common observations in this study, occurring at a similar incidence in the treated and control groups. Five of the twelve treated dogs that experienced one or more of these signs did so within 6 hours of the first dosing. One dog in the 3X treatment group was observed to be dull, inappetent, with evidence of bloody diarrhea, vomiting, and weight loss beginning five days after the first treatment. One dog in the 1X treatment group vomited food 4 hours following the first treatment.

Reproductive Safety Study: Bravecto was administered orally to intact, reproductively-sound male and female Beagles at a dose of up to 168 mg/kg (equivalent to 3X the maximum label dose) on three to four occasions at 8-week intervals. The dogs in the control group (0X) were untreated.

There were no clinically-relevant, treatment-related effects on the body weights, food consumption, reproductive performance, semen analysis, litter data, gross necropsy (adult dogs) or histopathology findings (adult dogs and puppies). One adult treated dog suffered a seizure during the course of the study (46 days after the second treatment). Abnormal salivation was observed on 17 occasions: in six treated dogs (11 occasions) after dosing and four control dogs (6 occasions).

The following abnormalities were noted in 7 pups from 2 of the 10 dams in only the treated group during gross necropsy examination: limb deformity (4 pups), enlarged heart (2 pups), enlarged spleen (3 pups), and cleft palate (2 pups). During veterinary examination at Week 7, two pups from the control group had inguinal testicles, and two and four pups from the treated group had inguinal and cryptorchid testicles, respectively. No undescended testicles were observed at the time of necropsy (days 50 to 71).

In a well-controlled field study Bravecto was used concurrently with other medications, such as vaccines, anthelmintics, antibiotics, and steroids. No adverse reactions were observed from the concurrent use of Bravecto with other medications.

Storage Information:

Do not store above 86°F (30°C).

How Supplied:
