Subject: Proposal for Construction Materials Testing Services
Fort Bend County Mobility Bond Project No. 20304
Tamarron Trace to FM 1463
Terracon Proposal No. P92231239

Dear Mr. Slawinski:

Terracon Consultants, Inc. (Terracon) is pleased to submit this proposal to provide construction materials engineering and testing services for the above referenced project. It is our understanding that we have been selected solely based on our professional qualifications. In this proposal we present our understanding of the scope of the project, our proposed services, and our budget estimate.

PROJECT INFORMATION

The site is located in Fort Bend County from Tamarron Trace to FM 1463 in Houston, Texas. The project involves the construction of widening of Tamarron Trace with addition sidewalk and curb being added.

Terracon was provided with the following construction documents for preparation of this proposal:

- Construction Drawings and specifications prepared by McDonough dated 1/25/2023.

If selected for this project, Terracon requests that we be placed on the distribution of all plan revisions.

Site Access and Safety - Client shall secure all necessary site related approvals, permits, licenses, and consents necessary to commence and complete the services and will execute any necessary site access agreement. Terracon will be responsible for supervision and site safety measures for its own employees, but shall not be responsible for the supervision or health and safety precautions for any third parties, including Client's contractors, subcontractors, or other parties present at the site.

Testing and Observation - Client understands that testing and observation are discrete sampling procedures, and that such procedures indicate conditions only at the depths, locations, and times the procedures were performed. Terracon will provide test results and opinions based on tests and field observations only for the work tested. Client understands that testing and observation are not continuous or exhaustive, and are conducted to reduce – not eliminate – project risk. Client agrees to the level or amount of testing performed and the associated risk. Client is responsible (even if delegated to contractor) for notifying and scheduling Terracon so Terracon can perform these services. Terracon shall not be responsible for the quality and completeness of Client's contractor's work or their adherence

to the project documents, and Terracon's performance of testing and observation services shall not relieve contractor in any way from its responsibility for defects discovered in its work or create a warranty or guarantee. Terracon will not supervise or direct the work performed by contractor or its subcontractors and is not responsible for their means and methods.

1.0 SCOPE OF SERVICES

1.1 Earthwork

- Sample select fill, onsite fill and treated subgrade. Prepare and test the samples for Atterberg Limits (ASTM D4318), moisture-density relationship (ASTM D698, ASTM D558 and ASTM D1557), and if required by the project specifications, percent fines (ASTM D1140).
- Sample cement-sand backfill for utility trenches, mold specimens, and perform compressive strength tests in the laboratory (ASTM D1633).
- Evaluate the subgrade soil for proposed chemically treated pavement subgrade.
- Observe the chemical treatment process for the pavement subgrade.
- Perform field gradation tests of treated subgrade.
- Measure the depth of treated subgrade using phenolphthalein.
- Observe proof-rolling operations of the pavement subgrades; and perform density tests of the select fill, utility trenches when proper protection is provided, and onsite soil material using the nuclear method (ASTM D6938) to determine the moisture content and percent compaction of the soil materials.

1.2 Cast-in-Place Concrete

- Sample and test the fresh concrete for each mix. Perform tests for slump, air content, and concrete temperature only; and cast test specimens (ASTM C172, C31, C143, C173 or C231, and C1064). Terracon understands that the contractor will be responsible for maintaining the initial curing temperature of the concrete test specimens. Terracon will record the initial curing temperatures only when conditioned curing boxes are provided by the contractor.
- Upon the request of the client, Terracon can provide conditioned storage containers for initial curing of the concrete test specimens to meet ACI 301-10 and ASTM C31. The estimated cost for each storage container will be provided upon request. Please allow seven working days to obtain the storage containers for your project. **Terracon requests that the contractor provide a secure and safe area to store place the container. Additionally, Terracon requests that the contractor provide a 110-volt electrical outlet adjacent to the storage area for our use.**
- Concrete will be sampled at a frequency of 1 set of test cylinders every 50 cubic yards for structural concrete, 1 set of test cylinders every 100 cubic yards for slabs, and 1 set of test cylinders every 150 cubic yards for pavement concrete. Terracon requests that a copy of the approved mix design(s) be provided to us prior to placement of the concrete.

- Perform compressive strength tests of concrete test cylinders cast in the field (ASTM C1231, C39). Five 4" x 8" concrete cylinders will be prepared for structural concrete having nominal size aggregate of 1¼" or less. Four 6" x 12" concrete cylinders per set will be prepared for concrete having a nominal size aggregate of greater than 1¼". When 6" x 12" cylinders are prepared, two cylinders will be tested at 7 and 28 days. When 4" x 8" cylinders are prepared, two cylinders will be tested at 7 days and three cylinders will be tested at 28 days.
- Observe reinforcing steel prior to concrete placement. We will observe the rebar size, spacing and configuration. **Terracon recommends we be scheduled a minimum of 24 hours prior to each concrete placement.**
- Within 48 hours of concrete placement, travel to project site to collect and transport hardened concrete test cylinders to Terracon's Houston laboratory for processing, curing and testing.
- Obtain cores from the pavements and perform 9-point thickness measurement and compressive testing (ASTM C42, C174). Coring will be performed by a Terracon approved Sub-Contractor.

1.3 Project Management / Administration

A project manager will be assigned to the project to review the daily activity and assist in scheduling the work. Field and laboratory tests will be reviewed prior to submittal. The project manager will be responsible for maintaining the project budget and will oversee the preparation of the final test reports.

Terracon recommends that the general contractor schedule pre-construction meetings prior to each phase of our proposed testing and observations to discuss the erection sequence, review welding and bolting requirements and to review welder certification records.

1.4 Special Inspections Letter

Upon completion of our services, a special inspection letter will be prepared, if requested. The letter will list services we performed and if the results and/ or observations were in compliance with the project documents. A copy of our test reports will be available with the special inspection letter if requested.

1.5 Additional Services

If you would like us to perform additional work, please contact us and we will issue a short Supplement to Agreement form, or Supplemental Proposal, that outlines the additional work to be performed and associated fees. To authorize us to begin work, you simply return a signed copy of the Supplemental agreement.

2.0 REPORTING & SCHEDULE

Results of field tests will be submitted verbally to available personnel at the site. Written reports of field tests and observations will be distributed within five business days. Test reports will be distributed via email. You will need to provide Terracon with a distribution list prior to the beginning of the project.

The list will need to include the company name, address, contact person name, phone number, and e-mail address for each person.

Our reported test locations will typically be estimated by pacing distances and approximating angles and elevations from local control data (staking and layout lines) provided by others on site. The accuracy of our locations will be dependent on the accuracy, availability and frequency of the control points provided by the client and/ or contractor.

Field testing services will be provided on an "as requested" basis when scheduled by your representative. A notice of 24 hours (48 hours is required for structural steel services) is required to properly schedule our services. To schedule our services please contact our dispatcher at (713) 690-2258. The dispatch office hours are from 7:00 a.m. to 5:00 p.m. Messages left after business hours will be checked the following business day. Terracon shall not be held responsible for tests not performed as a result of a failure to schedule our services or any subsequent damage caused as a result of a lack of testing.

Terracon recommends that a copy of this proposal be provided to the general contractor so they understand our scope of services and schedule us accordingly. Please note that the number of tests and trips described in the Scope of Services does not constitute a minimum or maximum number of tests or trips that may be required for this project.

It is the responsibility of your representative to schedule retests in a like manner to scheduling our original services. Terracon shall not be held responsible for retests not performed as a result of a failure to schedule our services or any subsequent damage caused as a result of a lack of retesting.

3.0 COMPENSATION

Based on the project information available for our review, we propose an estimate cost of **\$79,025**. Services provided will be based on the unit rates included in the attached Cost Estimate. Please note that this is only a budget estimate and not a not-to-exceed price. Many factors beyond our control, such as weather and the contractor's schedule, will dictate the final fee for our services. Quantities for re-tests, cancellations and stand-by time are not included in our fee.

For services provided on an "as requested" basis, overtime is defined as all hours in excess of eight hours per day, outside of the normal hours of 7:00 A.M to 6:00 P.M. Monday through Friday, and all hours worked on weekends and holidays. Overtime rates will be 1.5 times the hourly rate quoted. A 4-hour minimum charge is applicable to all trips made to provide our testing, observation and consulting services. The minimum charge is not applicable for trips to the project site for sample pickup only. All labor, equipment and transportation charges are billed on a portal to portal basis from our office. You will be invoiced on a monthly basis for services actually performed and / or authorized by the above listed client or designated representative. Terracon's total invoice fee is due within thirty days following final receipt of invoice.

4.0 SITE ACCESS AND SAFETY

Client shall secure all necessary site related approvals, permits, licenses, and consents necessary to commence and complete the services and will execute any necessary site access agreement. Terracon will be responsible for supervision and site safety measures for its own employees, but shall not be responsible for the supervision or health and safety precautions for any third parties, including Client's

contractors, subcontractors, or other parties present at the site. In addition, Consultant retains the right to stop work without penalty at any time Consultant believes it is in the best interests of Consultant's employees or subcontractors to do so in order to reduce the risk of exposure to the coronavirus. Client agrees it will respond quickly to all requests for information made by Consultant related to Consultant's pre-task planning and risk assessment processes. Client acknowledges its responsibility for notifying Consultant of any circumstances that present a risk of exposure to the coronavirus or individuals who have tested positive for COVID-19 or are self-quarantining due to exhibiting symptoms associated with the coronavirus.

5.0 TESTING AND OBSERVATION

Client understands that testing and observation are discrete sampling procedures, and that such procedures indicate conditions only at the depths, locations, and times the procedures were performed. Terracon will provide test results and opinions based on tests and field observations only for the work tested. Client understands that testing and observation are not continuous or exhaustive and are conducted to reduce – not eliminate – project risk. Client agrees to the level or amount of testing performed and the associated risk. Client is responsible (even if delegated to contractor) for notifying and scheduling Terracon so Terracon can perform these services. Terracon shall not be responsible for the quality and completeness of Client's contractor's work or their adherence to the project documents, and Terracon's performance of testing and observation services shall not relieve contractor in any way from its responsibility for defects discovered in its work or create a warranty or guarantee. Terracon will not supervise or direct the work performed by contractor or its subcontractors and is not responsible for their means and methods.
