APPENDIX A SCOPE OF SERVICES

infraTECH Engineers & Innovators, LLC

Project Understanding:

The design assignment will involve preparing Plans, Specifications and Estimates (PS&E) for the construction of a noise wall and possible reconstruction of sidewalk along the Hillcroft Ave. within the limit of the new noise wall. For concept estimating purposes, we anticipate a 14 feet-high wall, matching the existing BW8 EBFR noise wall height. The project is approximately 720 linear feet of wall length, but the exact limits and wall height will be determined by the noise analysis completed by others.

Project scope includes converting the right most through lane of the BW8 EBFR to a dedicated right turn lane towards Hillcroft Ave. South. Provide signing & pavement marking plan to establish a dedicated right turn lane.

The work also includes to provide necessary coordination support to the Program Manager to coordinate with City of Houston (COH), and the Texas Department of Transportation (TxDOT) Houston District.

Management Structure

RPS, Inc. will serve as the Program Manager; and, as an extension of Fort Bend County Engineering Department will continue as our single point of contact with the county through the duration of the design phase of this project.

BASE SCOPE OF SERVICES (Lump Sum):

Basic services will follow the design process outlined in the Fort Bend County Engineering Department EDM, dated May 2021 Draft.

Data Collection and Confirmation

- Conduct two site visits to collect existing data and photos, first one to collect preliminary data. Second site visit will be during the design phase to collect supplemental/missing information required to complete the design.
- Survey and geotechnical scope of services, which are also the part of this contract, for the project are attached in Appendix B.
- Review survey DGN file, DTM and TIN files provided by the surveyor.
- Coordinate soil boring locations. Review geotechnical recommendations.

Utility Location, Coordination and Conflicts

- Review existing utilities within the road ROW. Identify all known existing utilities on the plan and profile.
- Prepare and maintain utility log through the final design phase of the project. Coordinate with RPS' utility coordinator for the project to identify conflicts between the proposed improvements and the existing facilities. Prepare utility conflict table.
- Provide plan set roadway drawings at each submittal to the applicable utility companies for their use in developing any utility adjustment plans. RPS, the program manager, will take the lead on facilitating utility agreements as needed during the design process.

Fort Bend County will provide the following data:

- Pertinent noise analysis
- Environmental constraint map (i.e., Wetlands)
- Available design and construction standards and details pertinent to project scope.

Preliminary Design (30%)

Prepare the design to a 30% level of completion, based on survey information. Collect and evaluate relevant data, develop conceptual layout, and prepare traffic control plan (TCP).

- Noise Walls

Prepare two alignment options for the proposed noise wall taking into considerations the utility poles, existing ROW, and any need for additional easement from the adjacent property. Recommend the preferred noise wall alignment based on noise analysis, geometry, utilities, and environmental constraints. The existing sidewalk along Hillcroft ROW will be analysed and proposed sidewalk layout will be presented with each option. Prepare cost estimates for both options for cost comparison. Submit both options as part of 30% submittal to the Fort Bend County. Address comments provided by Fort Bent County.

As part of the 30% drawing submittal, provide preliminary typical sections and plan sheets identifying the total project footprint, including utilities, ROW, and wall, mow strip, and sidewalk limits. Review and respond to FBC and the Program Manager comments on 30% submittal.

Prepare preliminary signing, pavement marking plan for the dedicated right turn lane at the intersection of BW8 EBFR with Hillcroft Ave. Assess any impact on existing traffic light and propose necessary modification if needed.

Final Design

Based on the selected option from 30% submittal, proceed with completing the PS&E, including 95% and 100% submittals to the Program Manager. Incorporate 30% comments into PS&E. Provide responses and address 95% and 100% review comments from the Program Manager.
