Reason for Labor Change Order

New cameras come with installed IP addresses from the factory that allow the NVR and software to automatically recognize the cameras and establish a video connection.

It was discussed, however, in the initial Kick Off meeting to begin the project, that the County IT Dept. preferred to provide Securitas with a custom range of IP addresses for the cameras.

Since the IP addresses that came with the cameras were not compatible with the County IT Dept's IP Addressing scheme, the cameras would not make the connection to the NVR.

The new IP addresses have to be manually programmed by computer at each network switch location for each camera.

This need for additional technician labor hours was not known at the time the pricing and scope of work proposal was created.

Securitas Scope of Work

Securitas will program the County provided IP addresses for 59 existing cameras at the Bamore facility, 5 cameras at the Fairgrounds Park N Ride, 2 cameras at the U of H Park N Ride and 3 cameras at the AMC Park N Ride.
