THE COMPLIANCE ENGINE

The Compliance Engine is a simple, internet-based tool for code officials to track and drive code compliance, reduce false alarm activity, and provide a safer community. It provides a secure cloud environment in which third party contractors that inspect, test, and maintain fire protections systems, submit their reports via Brycer's web portal direct to the Fire Department, facilitating a more efficient review, tracking, and follow-up process with occupants to correct deficiencies and maintain systems. In addition to the web-based technology, our services include a team to administer hard and soft copy notifications and perform follow up calls to help increase testing and maintenance activity in a given jurisdiction. The end result is a comprehensive and accurate aggregation of data around which buildings have what types of systems, when they were last tested, and if there are any open deficiencies that could jeopardize their successful deployment in the event of an incident. With The Compliance Engine, the AHJ (Authority Having Jurisdiction) will be better equipped to do more with less in their mission to drive 100% code compliance with fire and life safety laws

Current Landscape:

- 40% of life safety systems go uninspected or maintained every year
- 32.5% of false alarms are due lack of maintenance and testing

AHJ Sample Requirement Letter to Fire Protection Contractors

Dear Service Provider,

The AHJ Name has instituted a new process for service providers who inspect and test fire protection systems. Effective **Go Live Date** all compliant & non-compliant fire protection systems test reports are required to be sent to the AHJ Name electronically by your respective organization via The Compliance Engine's online system at www.thecomplianceengine.com.

All service providers who inspect or test fire protection systems within the AHJ Name's jurisdiction are required to register and submit all test, inspection and service reports via The Compliance Engine. All reports must be submitted in accordance with the testing schedule and requirements outlined in our adopted fire code.

Once registered, pricing is viewable under AHJ Name icon in The Compliance Engine. If you are a licensed fire protection system contractor and are not currently registered with Brycer, please do so at www.thecomplianceengine.com.

Fire Protection System Testing

System test reports for many systems are mandatory and must be submitted electronically to the Seattle Fire Department via our online vendor at www.thecomplianceengine.com

There is a \$30 filing fee associated with the submission of each report, per system, per year, except for hood systems which are per every six-month service. Your service provider (the company you hire to do the testing and maintenance on your building's fire protection systems) is responsible for collecting these fees from their clients, administering the reporting requirements, and then submitting payments along with test reports.

Reports must be submitted within one week of the inspection or maintenance completion. Systems with impairments or red-tagged systems must also be reported immediately using the current mandatory **impaired systems reporting process**. Since January 2019, there has been a late fee of \$10 per report. Due to the continued high number of late report submittals, the City has now introduced a **citation** for reports that are submitted outside of allowed timelines.

In response to request for reference and benefits of using The Compliance Engine portal, as a Service Provider the benefits Johnson Controls Austin has experienced are as follows:

- Improved vendor oversight through portal features and analytics reporting options (Past Due Inspections, Outstanding Deficiencies)
- Improved owner accountability for maintenance of life safety systems
- Reduced liability through reduced timeline for deficiency resolution
- Improved relationships with our AHJ partners through increased visibility and communication
- Increased visibility for Owners through automated correspondence and notification features
- Increased demand for life safety services and revenue opportunity
- Once our initial implementation of The Compliance Engine was adopted, including additional AHJs to the process has been relatively seamless.

Thank you for the opportunity to provide feedback.
