Work includes the design of the bridge superstructures and substructures, which includes the approach slab, all abutment components, battered piles, bridge girders, and decking. All bridge components are designed to meet AASHTO-LRFD 9th Ed. 2020 and TxDOT standards.

This description of the scope of work is general in nature and is intended as an overview of the project only. The complete detailed scope of work and bid items are contained in the construction drawings and specifications.
